Independent Auditor's Report

To the Management of the insurance company «CNP ZOIS S.M.S.A.»

Opinion

We have audited the Prudential Reports (prepared in accordance with the Commission Implementing Regulation (EU) 2015/2452) as at **31 December 2022**, which comprise the Solvency II Balance Sheet (template S.02.01.02), the Technical Provisions (templates S.12.01.02, S.17.01.02), the Own Funds (template S.23.01.01), as well as the relevant Quantitative Reporting Templates (templates S.19.01.21, S.22.01.21, S.25.01.21, S.28.01.01 or S.28.02.01) (henceforth the Prudential Reports), that are included in the accompanying "Solvency and Financial Conditions Report" of the company "**CNP ZOIS S.M.S.A.**" (henceforth the Company) as at **31 December 2022**.

In our opinion, the Prudential Reports of **December 31, 2022**, which are included in the accompanying "Solvency and Financial Condition Report" of the Company for the year ended **31 December 2022**, are prepared in all material respects, in accordance with the Commission Implementing Regulation (EU) 2015/2452 and the relevant provisions of Law 4364/2016, as well as under the methodology described in Sections D and E of the accompanying "Solvency and Financial Condition Report".

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as adopted by Greek Legislation. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Prudential Reports section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) as adopted by Greek Legislation, together with the ethical requirements that are relevant to our audit. We have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter - Basis for preparation and limitation of use

We draw your attention to the Sections D and E of the accompanying "Solvency and Financial Condition Report", which describe the regulatory provisions and the methodology applied in the Prudential Reports, which have been prepared to assist the Company's management in fulfilling its obligations under Law 4364/2016. As a result, the Prudential reports and our report on these may not be suitable for any other purpose. Our report is intended only for use by the Company's management, in order to fulfill its regulatory obligations to the Private Insurance Supervision Directorate (D.E.I.A.) of the Bank of Greece, which may require modification or reformation of the Company's published reports or the publication of additional information, as well as the taking of other actions by its management. Consequently, this report should not be used by other parties. Our opinion is not modified due to this matter.

Other Information

Management is responsible for the other information. The other information comprises the information included in the "Solvency and Financial Conditions Report" which is approved by the Board of Directors but does not include the Prudential Reports and our auditor's report thereon.

Our opinion on the Prudential Reports does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Prudential Reports, our responsibility according to Executive Committee Act 105/12.12.2016 of the Bank of Greece, is to read the Other Information in order to better understand the objects of our audit and how this to consider the qualitative information included in the Solvency and Financial Conditions Report which are linked to the quantitative information of the audited Prudential Reports.

Responsibilities of Management and Those Charged with Governance for the Prudential Reports

Management is responsible for the preparation and presentation of the attached "Solvency and Financial Conditions Report" in accordance with the Commission Implementing Regulation (EU) 2015/2452, the requirements of Law 4364/2016 and the methodology, as described in Sections D and E of the attached Report, and for such internal control as management determines is necessary to enable the preparation of the Prudential reports that are free from material misstatement, whether due to fraud or error.

Those Charged with Governance are responsible for overseeing the entity's financial reporting process.

Auditor's Responsibilities for the Audit of the Prudential Reports

Our objectives are to obtain reasonable assurance about whether the Prudential Reports are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with International Standards on Auditing as adopted by Greek Legislation, will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Prudential Reports.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Prudential Reports, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies and methods used and the reasonableness of accounting estimates and related disclosures of the "Solvency and Financial Conditions Report" made by management.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Other matters

a) Bank of Greece, as a Supervisory Authority under Law 4364/2016, may require amendment or reviewing published Company reports or publishing additional information, as well as other actions taken by its management. The preparation of the Prudential Reports and the "Solvency and Financial Condition Report", as well as our audit, has been conducted on the assumption that no additional requirements are available from the Supervisory Authority.

b) Our audit of the Prudential reports does not constitute a statutory audit of the Company's financial statements for the year ended **December 31, 2022** and therefore we do not express an opinion on these financial statements.

About this Report

CNP Zois S.M.S.A. (CNP Zois, Company) is committed to maintaining public transparency with regard to its business, financial performance, and risks. In this document, *Solvency and Financial Condition Report (SFCR, Report)*, the Company provides additional detailed information on its solvency and financial condition.

This Report is based upon the financial position of CNP Zois as of 31 December 2022 and it contains both quantitative and qualitative information in accordance with the Orders of the Superintendent of Insurance in relation to submission of information dated February 2017/ Article 304 (1) of the Delegated Regulation EU 2015/35.

The objective is to present the Company's business and performance, the main components of its financial position and system of governance. It also describes the Company's risk profile, the qualitative composition of its own funds and capital requirements as well as its coverage ratios.

The information in this Report was subject to external audit for reasonable assurance according to the Decision 105/12.12.2016 of the Bank of Greece. The Auditors' Report is presented in page 2 and forms an integral part of the SFCR.

The Bank of Greece, under its supervisory assessment, may require the amendment or revision of the Report or the publication of additional information or the undertaking of other actions by the Company.

The Company's appointed auditor for the year ended 31 December 2022 was Mazars Certified Public Accountants Business Advisors S.A. (14 Amfitheas Avenue, 175 64 Palaio Faliro, Greece). Mazars S.A in Greece is registered with the Institute of Certified Public Accountants of Greece (SOEL Reg. No. 154).

The report was approved by the Company's Board of Directors (Board, BoD) on the 5th of April 2023 and is in accordance with its Disclosure and Reporting Policy.

About Solvency II Pillar 3

The Solvency II (SII) programme is structured around three pillars. The Pillar 1, Solvency and Capital Requirements and the Pillar 2, Supervisory Review Process, are complemented by Pillar 3 market discipline. The aim of Pillar 3 is to produce disclosures that allow greater level of transparency for the Supervisor and the public on the capital adequacy, risk exposures as well as risk management and internal control processes.

The Company is directly regulated and supervised on a solo basis by the Bank of Greece, 21 E. Venizelos Avenue GR 102 50 Athens, Greece. The Company also reports to its sole controlling shareholder in France, CNP Assurances, being subject to financial oversight by the Autorité de Contrôle Prudentiel et de Résolution in France at 4 Place de Budapest, 75436 Paris France.

CNP Zois publishes comprehensive Pillar 3 Disclosures annually on its website www.cnpzois.com

Defined Term

The abbreviation “€k” represents thousands of Euros and numbers are rounded to the nearest thousand.

Summary

A. Activity and Results

CNP Zois is a 100% owned subsidiary of CNP Cyprus Insurance Holdings Ltd (CNP CIH), a private limited company incorporated in Cyprus. As from October 2019, the sole shareholder of CNP CIH is CNP Assurances S.A. with a share capital of 100%, an insurance company of French interests.

The principal activity of CNP Zois is the underwriting of Life and Health insurance business. The Company's Gross Written Premium (GWP) for the year 2022 was at €3.178k, presenting a relative decrease of 11% compared to the corresponding amount at the end of 2021.

The Underwriting Profit reached €1.383k with the main contributor being the Savings & Unit-linked products Insurance (72% of the Underwriting Profit).

During 2022, the Company faced a number of external challenges including:

- the inflationary effects of Covid-19, followed by the Russian-Ukraine war and additional inflation, resulting changes in interest rates, a possible recession
- a number of regulatory changes and developments (enhanced sanctions reporting due to Ukrainian war, SFDR, EU taxonomy, DORA, IDD changes, SII changes, outsourcing new guidance, operational resilience guidance, conduct risk guidance etc.).

The investment return of the Company was negatively affected as the global economy was further hit by inflationary pressures. During 2022, the Company experienced a negative investment income of €1.461k in comparison with the negative investment income of €2k in the previous year.

Despite the changes in the external environment, CNP Zois responded to all challenges and adapted its organisation and operation for the maximum benefit of its customers, associates, salesforce and employees.

CNP Zois continued its corporate and social responsibility program in 2022. The key figures of the Company are presented herein below.

Solvency II Balance Sheet				
In thousands €	31/12/2022	31/12/2021	Movement	
Investments	25.036	23.785	5%	
Other Assets	1.275	757	68%	
Total Assets	26.311	24.542	7%	
Technical Provisions	17.543	17.637	-1%	
Other Liabilities	1.786	1.984	-10%	
Total Liabilities	19.329	19.621	-1%	
Excess of assets over liabilities	6.982	4.920	42%	
Eligible Own Funds	6.982	4.920	42%	

B. Corporate Governance

CNP Zois has in place a clear organisational structure, and well defined and consistent lines of responsibility and oversight are maintained. The Company maintains and operates effective policies and procedures, in line with the nature of the business and the size of the organisation, thus ensuring the continuity and regularity of its operations of the insurance services activities.

The Company is committed to continuously improve its overall risk management and internal control system.

The main principles and procedures governing the Company's Corporate Governance System are analysed in **Section B** of the Report.

C. Risk Profile

The risk profile of CNP Zois is predominately driven by market risk since the solvency capital of the this risk represents the 77% of the Basic Solvency Capital Requirement (BSCR) before diversification. Diversification effects are taken into account when capital requirements are aggregated by using correlation matrices and this is intended to reflect potential dependencies.

The Company is exposed to Pillar 1 risks (market, counterparty default, life underwriting, health underwriting and operational risk) as well as risks not fully covered by Pillar 1 such as strategic, business, liquidity, legal and compliance and reputational. For optimal risk management, the Company has adopted appropriate risk mitigation techniques per type of risk.

The Company uses the standard formula to calculate its Pillar 1 risks and in 2022, it revisited its normal and stress scenarios.

In 2022, CNP Zois also successfully submitted to the Bank of Greece the Quantitative Reporting Templates (QRTs).

D. Valuation of Assets and Liabilities

The valuation of the assets and liabilities of the SII Statement of Financial Position is carried out by a Valuation Policy and Reserving Policy endorsed by the Company's BoD. The Company prepares its Financial Statements in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union (EU).

As a principle, the Company's assets and liabilities (particularly financial instruments) are valued on a fair value basis and are then included either directly in the IFRS Statement of Financial Position or disclosed in the notes to the financial statements. For its SII Statement of Financial Position, the Company uses the fair value of assets and liabilities as calculated for IFRS accounting purposes, insofar as this value complies with SII asset and liability valuation principles. This ensures that a reliable SII Statement of Financial Position will be produced as part of an orderly, well-managed process. It also ensures consistency with the IFRS financial statements.

There are instances where, the value of certain items may be estimated using simplified approaches when those items do not represent significant exposure or when the difference with fair value as calculated under IFRS is not material. The Company is consistent in applying the valuation techniques unless it considers that an alternative method would result in a more appropriate measurement. Such change in methodology is reported for transparency purposes.

The Company applies the volatility adjustment in the calculation of the Best Estimate of its Liabilities.

The Company's SII technical provisions amounted to €17.543k at 31 December 2022.

E. Capital Management

As at 31 December 2022, the Own Funds (OF) of the Company under IFRS amounted to €7.176k and under the SII (eligible for SCR coverage) amounted to €6.982k, increasing by 42% in comparison with the previous reporting period. The basis of consolidation for financial accounting purposes differs from that used for SII purposes. All of the Company's Own Funds consist of Tier 1 funds.

In thousands €	31/12/2022	31/12/2021	Movement
Basic Own Funds	6.982	4.920	42%
Tier 1	6.982	4.920	42%
Tier 2	0	0	-
Tier 3	0	0	-
Solvency Capital Requirement SCR	2.500	2.604	-4%
Eligible own funds to meet Solvency Capital Requirement	6.982	4.920	42%
Solvency Capital ratio	279%	189%	48%
Minimum Capital Requirement MCR	4.000	3.700	8%
Eligible own funds to meet Minimum Capital Requirement	6.982	4.920	42%
Minimum Capital Requirement Ratio	175%	133%	31%

For the year 2022, the Company adequately covered its SII Capital Requirements. The total Solvency Capital Requirement (SCR) of the Company as at the end of 2022 came up to €2.500k with a total Minimum Capital Requirement (MCR) at €4.000k. These amounts are subject to supervisory assessment. The SCR ratio and MCR ratio were at the level of 279% and 175% respectively as of 31 December 2022.

The SCR of the Company based on the standard formula calculations are presented below.

Total Capital Requirements			
In thousands €	31/12/2022	31/12/2021	Movement
Market Risk	2.103	2.019	4%
Counterparty Default Risk	308	535	-42%
Life underwriting risk	64	270	-76%
Health underwriting risk	249	205	21%
Total	2.724	3.029	-10%
<i>Diversification</i>	<i>-424</i>	<i>-652</i>	<i>-35%</i>
Operational Risk	200	227	-12%
Solvency II Capital Requirement	2.500	2.604	-4%

The Company did not declare dividends for the year 2022.

A. Business and Performance

A.1. Business

The Company was incorporated on 14 February 2002 with the name Laiki Life and had received authorisation from the Private Insurance Supervisory Committee to operate as Insurance Company under the licence number AP.M.A.E. 51157/05/B/02/3 offering insurance products for classes I, III, IV, VII.

Following a number of changes in the Company's legal name, as of 14 January 2020, the Company operates under the legal name CNP Zois S.M.S.A. and under license number Γ.E.MH 4629401000. The Company's registered office is located at Andrea Syggrou, 162-166 (Building 1), 17671 Kallithea, Greece.

The principal activity of CNP Zois is the underwriting of Life and Health insurance business. The nature of products in the Company's portfolio is credit life, savings non-linked and unit linked, health (in hospital and out of hospital), term and riders (apart from health) at individual and group base.

CNP Zois is a 100% owned subsidiary of CNP CIH, a private limited company incorporated in Cyprus. CNP CIH is the parent company of all the insurance companies of the CNP Cyprus Group in Cyprus and Greece. The fellow insurance subsidiaries of CNP Zois are CNP Cyprialife Ltd and Asfalistiki Ltd incorporated in Cyprus.

Since October 2019, CNP Assurances holds 100% of the share capital of CNP CIH, being the sole shareholder of the CNP CIH Group.

The sole shareholder of CNP Assurances is La Banque Postale and the ultimate beneficial owner of CNP Assurances is Caisse des Dépôts.

CNP Assurances Group is France's leading provider of personal insurance, the sixth largest life insurer in Europe and the third largest insurance company in Brazil. It was founded 170 years ago and worldwide has 36 million insureds under personal risk and protection policies and 11 million savings and pension policyholders. In 2022, the Group reported premium income of €36 billion and its net average technical reserves were €364 billion. 89% of CNP Assurance's financial assets are managed according to environmental, social and corporate governance.

The Company's related parties for the year 2022 are listed below:

1. CNP Cyprus Insurance Holdings LTD
2. CNP Asfalistiki Ltd (Greek Branch)
3. CNP Cyprialife Ltd
4. CNP Praktoriaki S.A.
5. Anaptyxeis Plagias S.M.S.A.
6. OPCI RASPAIL

2022 Highlights

Solvency II: The Company is compliant with the Greek Law 4364/2016 on Insurance and Reinsurance and with regards to SII. The Company's governance arrangements, policies, procedures, practices and standards are aligned in accordance with the key Solvency II requirements.

The unfavourable market conditions and the significant impact of the Ukrainian war following Covid-19 pandemic, further stressed the Company's position and during the year the Company's BoD authorized two capital injections, €1 million in March 2022 and €3 million in October 2022, to counter the Company's investment losses and meet its Solvency requirements.

As at 31 December 2022, the Company's SCR coverage ratio is at 279% and the MCR coverage ratio is at 175% remaining above the regulatory thresholds.

Distribution Channels and Customer Service: CNP Zois channels its products mainly through its network of independent insurance intermediaries. The Company is also committed to high standards of customer service.

Risk Management: The Company via its Risk Management Framework manages its risk profile to reflect the objective enhancing its financial strength and capital position.

Regulatory developments: Following the fast-changing regulatory developments of recent years, the Company is following a continuous training programme for its members of staff in the following areas:

- Insurance Distribution Directive 2016/97 (IDD)
- PRIIPs
- Data Privacy Directive (2016/680) and Regulation (2016/679) and Greek Law 4624/2019
- Anti-Money Laundering (AML) 5th Directive
- Commission Delegated Regulation EU 2019/981
- Law 4611/2019, concerning the termination of employment contracts and the liability of employees during the term of their employment.
- Cyber Security
- Integration of sustainability preferences in the suitability assessment under the IDD (2021/ 1257)
- Sustainable Finance Disclosures Regulation (SFDR) – Level 1 (2019/2088)
- EU Taxonomy Regulation (2020/ 852)
- Commission Delegated Directive EU 2021/ 1269 of 21st of April 2021

The Company is also preparing and takes all necessary actions for the following regulatory developments that are expected to come into force:

- International Financial Reporting Standard 17
- Corporate Sustainability Reporting Directive
- Commission Delegated Regulation 2022/ 1288

IFRS17: Significant progress was achieved during 2022 and the Company has already calculated the impact regarding the first-time application of the new Standard and also the necessary amounts for the comparative period. Under the supervision of the Head Office, 2022 reporting (being the comparative figures for 2023 reporting) has been reported under the IFRS 17 environment in parallel with the IFRS 4 regime. The future impact on performance and results, from IFRS 17 will be taken into account in key decision making as appropriate.

External Environment: The external environment is constantly changing. Following Covid-19, the Company is now encountering the effects of the Ukrainian war, including inflation, increasing interest rates and a possible future recession. The Company continues to monitor the situation closely and complies fully with any sanctions imposed by the EU. The short- and medium-term financial risk, as a result of the volatility prevailing in the capital markets, is actively monitored. The Company's SCR Coverage ratio at the date of publication of the Report is above the minimum threshold set in the Company's risk appetite statement.

Social Responsibility: CNP Zois stands with sensitivity and solidarity next to the people in need and beside the Greek society. During 2022, and on the occasion of the "World Childhood Cancer Day", the Company offered its four Critical Illness insurance products for a specific time period with a discount. Furthermore, the Company was also active in the "Challenge Let's Move for a good cause" for the benefit of associations helping the Ukrainian people.

In addition, for the first time, CNP Zois supported its fellow Cypriot subsidiaries, CNP Cyprialife and CNP Asfalistiki, in the organisation of "Radiomathonios", the leading volunteering action of social sensitivity and contribution to the most vulnerable group, the children in Cyprus.

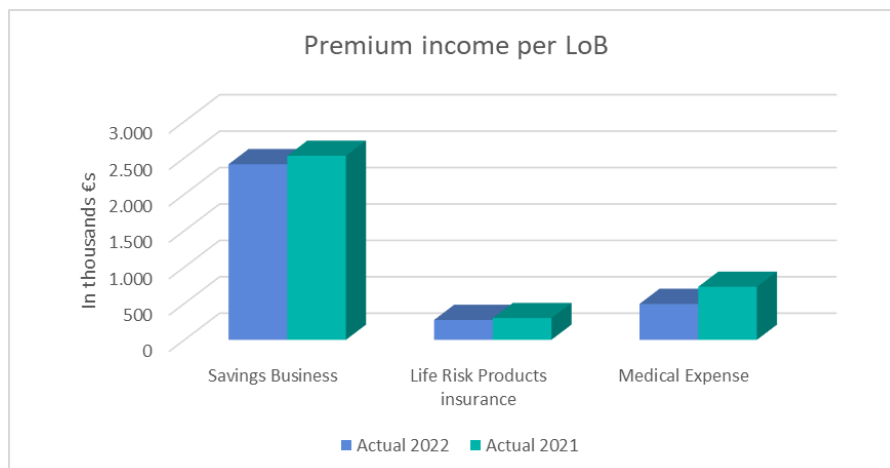

Sustainability and ESG: CNP Zois supports the transition towards a more prosperous, sustainable, and resilient industry. The Company is establishing an ESG team, whose scope will be to ensure adherence to key emerging regulation. As such, the Company is strategically positioned to deliver its mission: contribute to a sustainable financial and insurance industry by taking into account any additional sustainability related factors, to ensure the protection of the interest of its key stakeholders including customers, employees, partners, our shareholders, the environment / planet, and society.

Going forward: CNP Zois continues focusing on the development and growth of its business while:

- Providing an excellent service to its customers
 - Maximising shareholders' return and strengthening its capital position
 - Remaining a responsible company and a responsible employer
- Complying with all relevant laws and regulations

A.2. Underwriting Performance

The premium income figures in this Section present the GWP of the Company for the years 2022 and 2021. The Underwriting portfolio of the Company has remained relatively at the same levels compared to 2021. The GWP decreased compared to the previous period mainly due to decrease in Medical Expense business.

In 2022, the Company reached an Underwriting Profit of €1.383k with the main driver being the Savings and Unit-linked and Life Risk Products (93% of the total Underwriting profit).

The Underwriting Profit for 2022 increased by 67% compared to last year due to reduced surrenders and maturities in Savings and Unit-linked business .

Gains and losses recognized directly in equity

The loss recognised by the Company directly in equity was €1.405k (2021: €255k loss) mainly derived from fixed income products (single line bonds and Mutual Fund Bonds).

Risk Mitigation

The Company follows its approved by the BoD Tactical Asset Allocation (TAA) determining the optimum asset allocation. The Company's aim is SII optimisation and reduction of concentration risk, while at the same time maintaining the required liquidity in order to fulfil its operational requirements.

The Company's Investment policies include prohibitions for assets to minimise its market risk as well as policies for the credit standing of financial institutions in order to minimise the counterparty default risk.

The Company continuously monitors the performance of investments against set benchmarks as well as associated to investments risks.

Prohibited investments

The Company does not allow, under any circumstances, investment in high-risks instruments or complex financial instruments, the risks of which cannot be fully understood, measured and managed. In particular, the following investments have been assessed as high risk and/or complex and are therefore, not permissible:

- Repackaged loans investment, asset backed securities or other securitisation position
- Collateralised debt obligations / Collateralised loan obligations
- Investment in Conduits or SIVs, SPVs and ISPVs
- Investment in Commodities
- Any other investment or instrument that is not allowed by local law, regulation and CNP Assurances
- No investments are allowed in business deriving more than 20% of their revenue from thermal coal
- No new investments are allowed in companies deriving more than 10% of their revenue from thermal coal or that are involved in developing new coal mines or coal-fired power plants

B. System of Governance

B.1. General Information on the System of Governance

CNP Zois has in place a clear organisational structure, while ensuring the continuity and regularity of its operations. Well-defined and consistent lines of responsibility and oversight are maintained. The Company uses the three lines of defence model. The First Line of Defence has primary decision making on a day-to-day basis, and accordingly for their respective areas, in line with the Board and stakeholder expectations. The Second Line of Defence primarily consists of the Risk Management Function (RMF) and Legal & Compliance Function, although elements of other support functions such as Actuarial may also be involved. It provides support on tactical and strategic decision making. The Third Line of Defence provides independent assurance and challenge across all business functions in respect of the integrity and effectiveness of the Enterprise Risk Management Framework. The Internal Audit Function is responsible for independently assessing the effectiveness of the risk management process and practices and for providing timely objective assurance on the control of risk.

CNP Zois organizational arrangements fulfil the SII regulatory requirements via its established key functions and well documented policies and procedures.

The Company's BoD and its Audit & Risk Committee are kept informed on all material risk-related matters and exposures.

The Remuneration Committee is also kept informed on all material risk related matters under its mandate.

Board of Directors and BoD Committees

The BoD is the ultimate authority for the management of the Company, and it maintains responsibility for prudent management. The role of the BoD is to define the strategic plan, organise and direct the affairs of CNP Zois in a manner that seeks to protect its policyholders' interests and maximise the value of the Company for the benefit of its shareholders, while complying with regulatory requirements and relevant governance standards.

The BoD bears the ultimate responsibility for the compliance of the Company with its legal and regulatory obligations at a national or EU level as applicable.

BoD meetings are taking place when needed but at least four times per annum and a quorum must be achieved to form decisions. In 2022, the BoD convened five times.

The Company has an experienced and diverse BoD. The members of the BoD remained fit and proper according to the SII requirements.

In July 2022, Mrs. Brigitte Molkhou resigned from her role due to her retirement from CNP Assurances' employment and was specially thanked for her valuable tenure and the BoD welcomed Mrs. Sonia Barriere as a non-Executive Director. Mrs. Barriere was also appointed by the BoD as the Chairperson replacing Mr. Xavier Larnaudie-Eiffel who resigned from the position of the Chairman and continues as a non- Executive member of the BoD. Mr. Desvignes was also appointed by the BoD as the Vice-Chairperson.

Board of Directors		
Chairperson	Non-Executive	Sonia Barriere (appointed in July 2022)
Vice- Chairperson	Non-Executive	Thiery Desvignes
CEO	Executive	Takis Phidia

Secretary		Polys Michaelides

Audit & Risk Committee

The Audit & Risk Committee assists the BoD in meeting its responsibilities in ensuring an effective system of internal control and compliance for the Company. The Committee also assists the BoD in meeting its external financial reporting obligations, including its obligations under applicable laws, and regulations and is directly responsible on behalf of the BoD for the selection, oversight and remuneration of the external auditor.

Additionally, it assists the BoD with the formulation of the overall risk strategies and policies for managing significant business risks; the design and implementation of the Company's Risk Management Framework; the monitoring and review of the risk exposures and it reviews, challenges and approves actuarial reserves.

The Committee convenes with such frequency as it may consider appropriate but, in any event, not less than two times a year. In 2022, the Audit & Risk Committee convened five times.

Remuneration Committee

The Remuneration Committee has primary responsibility to review and approve or make recommendations to the BoD of the Company regarding remuneration of executives and ensure compliance of the Company's remuneration policy and practices with applicable laws and governance regulations.

The Committee convenes with such frequency as circumstances dictate, but in any event not less than once a year. In 2022, the Remuneration Committee convened three times.

Remuneration Disclosure

The Company's Remuneration Policy applies to the Company as a whole and is reviewed and maintained by the CNP Zois Remuneration Committee and is approved by the BoD. The Remuneration Committee of the Company is responsible for the implementation of the Remuneration Policy.

The Company's Remuneration Committee defines the remuneration practises applicable to all employees and material risk takers of the Company.

With regards to the members of the BoD, the Remuneration and Nominations Committee which is authorised by the BoD of CNP CIH has primary responsibility to review and make recommendations regarding the remuneration of the Chief Executive Officer (CEO) and members of the BoD.

The remuneration of the Directors is approved by the shareholders at the Annual General Meeting.

The collective remuneration of the Company's Board of Directors for the year 2022 was at €7,7k.

Management

The Company's Management has the responsibility for the consistent implementation of the BoD approved strategy through setting appropriate policies for all functions and the development and embedding of the mechanisms and procedures for internal control.

The Company's Management consists of the individuals in positions that effectively run the Company.

In September 2022, Mr. Jean Pascal Garret, the former Deputy CEO, assumed a new position in CNP Assurances and was specially thanked for his valuable tenure. In October 2022 the Company welcomed Mr. Guillaume De Winter as the new Deputy CEO.

The CEO of the Company is Takis Phidia, and the General Manager is George Georgakopoulos.

The Company also has a number of management committees including:

- The Risk & Reserving Committee which is an advisory Committee to the Audit & Risk Committee and assists in the formulation of the overall risk strategy and policies for managing business risks and is responsible for designing and implementing the Company's overall risk management framework.
- The Investment Committee which is an advisory Committee to the BoD and assists in managing the policyholders and own Company assets in a professionally sound manner, and in accordance with all applicable laws and regulations.
- The Underwriting Committee which is an advisory Committee to the BoD and assists in the validation of new products, new partnerships or big clients and the assessment of significant changes in the underwriting portfolio of the Company regarding pricing, reinsurance program and reserves.
- The Reinsurance Committee, which is an advisory Committee to the BoD and is responsible for the oversight and approval of the Company's reinsurance program.

B.2. Fit and Proper Requirements

The Company has in place a Fit & Proper Policy including standards and requirements for assessing fitness and probity. The purpose of the Fit & Proper Policy is to set out the corporate governance and oversight arrangements to ensure the sound and prudent management of the business as well as to ensure that the persons who effectively run the Company or hold key functions fulfil at all times the following requirements:

- Their professional qualifications, knowledge and experience are adequate to enable sound and prudent Management (fit)
- They are of good repute and integrity (proper)

The covered individuals are required to comply with the requirements and behaviours set by the Supervisory Authority and the Company's Code of Ethics under the Fit and Proper Policy.

The Company also ensures that the collective knowledge, competence and experience of its BoD members, includes:

- Market knowledge
- Business strategy and business model
- System of governance
- Financial and actuarial analysis
- Regulatory framework and requirements

B.3. Risk Management System including ORSA

Risk Management

CNP Zois has an effective RMF and an appointed Chief Risk Officer (CRO) in charge of developing and implementing the policies and risk aware culture within the Company, as well as providing important insights in relation to current and future risks.

The appointed CRO from its holding company CNP CIH is Georgia Tsiakki. The responsible person for overseeing the outsourced RMF activities during the reporting period was Efstathia Yiannopoulou.

The RMF is independent of risk-taking functions. The CRO has a direct reporting line to the BoD via the Audit & Risk Committee of the BoD to escalate important issues. The RMF has also a functional direct reporting line and an open communication line with the Group RMF of CNP Assurances. For administrative matters, the role reports to the Company's Deputy CEO.

The Risk Management framework of the Company is presented herewith below. CNP Zois has enhanced its Risk Management Framework ensuring that all risks are effectively managed and measured against a set level of risk tolerance.

The Company's policies for the key areas of risk were revised and approved by the BoD in the year.

The Company adopts the following guiding principles as a formal Policy for the management of risk:

- The Company's governance structure and risk management framework aim to create and promote a strong risk culture that is embedded in all aspects of its activities.
- The BoD is responsible for overseeing senior management, for establishing sound business practices and strategic planning as well as for setting the risk appetite and risk tolerance at a level which is commensurate with its sound operation and the strategic goals. In setting the Company's risk appetite and risk tolerance level, all relevant risks are taken into account. The BoD has the ultimate responsibility for the effective management of risk.
- The level of risks that the Company is willing to take is determined by a number of factors, including constraints imposed by regulation and supervision, intrinsic risk aversion, but also on the current financial situation and the Company's strategic direction.

- CNP Zois implements a consistent risk culture and establishes sound risk governance supported by an appropriate communication policy, all of which are adapted to its size, complexity and risk profile.
- The Company is aware of its responsibilities relating to the identification and reporting of relevant risks.
- The Company has an established, and independent from risk taking activities Risk Management Function in order to ensure effective risk management.
- The Company ensures that the responsibilities for the measurement, monitoring and control of risks are clearly defined and sufficiently independent from any risk-taking activity.
- In consideration of the Company's current and future needs, it develops risk measurement systems and tools with the purpose of capturing all expected and unexpected losses, for each type of risk, under both normal and stressed market conditions.
- The Company applies high standards of transparency for the performance of its operations and communicate all the information it considers necessary and in line with its Reporting & Disclosure Policy to the interested and affected parties.
- The Company analyses new products, markets, and businesses carefully and makes sure that it possesses adequate internal tools and expertise to understand and monitor the risks associated with them.
- The governance of risk is documented and updated as appropriate.
- All outsourcing activities are in accordance with the Company's Outsourcing Policy and the risks arising from such activities are managed in accordance with its defined risk appetite and policies.

Risk Management Framework

Risk is inherent in CNP Zois' business activities and is linked to strategic and capital decisions. The Company aims through appropriate risk management, to achieve its business and financial strategy by considering internal as well as external constraints without exceeding set risk tolerances. The Company uses an enterprise-wide risk management framework across all risk types which is underpinned by the Company's risk culture.

The Company's Risk Management Framework is designed to establish effective risk governance, policies and procedures relevant to the size and nature of its business and to ensure compliance with the legislative requirements.

The Risk Management Framework of CNP Zois is an embedded part of its business interacting with the strategic planning and the capital management process and is the guiding framework for the implementation of the Own Risk and Solvency Assessment (ORSA) process. In addition, the Risk Management Framework establishes the mechanism and strategy through which the Company manages risk, taking into account its business objectives and vision, as well as its overall risk appetite.

The Company's Risk Management Framework is based on four key elements:

- Governance
- Risk Quantification and Aggregation
- Risk Control and Optimization
- Risk Monitoring and Reporting

The Risk & Reserving Management Committee plays a fundamental role in the management of risk. The Committee is chaired by the Company's CEO and its members include the Company's Deputy CEO, General Managers of CNP Zois and CNP Cyprialife, Chief Risk Officer (CRO), Chief Financial Officer (CFO), Chief Actuarial Officer (CAO) and the Actuarial & Reinsurance Department Head.

The Committee assists with the formulation of the overall risk strategies and policies for managing significant business risks and is responsible for designing and implementing a Risk Management Framework. In addition, the Committee monitors and reviews risk exposures, reviews and challenges actuarial reserves and it advises the Audit & Risk Committee of the BoD on the approval of reserves.

Risk Appetite

Risk Appetite is a key component for the management of risk. It describes the aggregate level and risk types that the Company is able and willing to accept in pursuing its medium to long term business objectives. Risk appetite is managed and articulated through the Risk Appetite Statement, which is approved by the BoD on the advice of the Audit & Risk Committee.

The risk appetite is integrated within other risk management tools such as the ORSA and stress testing to ensure consistency in risk management.

CNP Zois faces a range of risks reflecting its responsibilities as Insurance Company in the Greek market. These risks include those resulting from the Company's responsibilities in the area of offering credit life, savings non-linked and unit linked, health, term and group (life, health and pension) insurance to the public as well as its day-to-day operational activities. The risks arising from the Company's responsibilities can be significant. These risks are prudently managed through processes that emphasise the importance of integrity, intelligent inquiry, maintaining high quality staff, and public accountability.

In terms of operational issues, CNP Zois has a moderate appetite for risk. The Company makes resources available either in-house or from the fellow insurance companies of CNP CIH Group, to control operational risks to acceptable levels. The Company recognises that it is not possible or necessarily desirable to eliminate some of the risks inherent in its activities and the acceptance of some risk is often necessary to foster innovation within business practices.

The Company identifies and manages the risks it incurs on an ongoing basis. As part of this, CNP Zois follows a risk strategy that is designed to ensure the continuity as a going concern, protecting earnings, maintaining sound Statement of Financial Position and solvency ratios as well as protecting its identity and reputation.

The Company's objectives when managing capital are:

- The compliance with capital requirements imposed by the Bank of Greece
- To safeguard the Company's ability as a going concern so that it provides returns for shareholders and benefits to other stakeholders
- To provide an adequate return to shareholders by pricing insurance and investment contracts commensurately with the level of risk
- To safeguard the policyholder's interests by maintaining a robust capital base

Risk exposures

The risk measurement framework and reporting systems are designed to help ensure that risks are comprehensively captured with all the attributes necessary to support well-founded decisions and that information is delivered in a timely manner for those risks to be successfully managed and mitigated.

The Company invests resources in Information Technology (IT) systems and processes in order to maintain and improve its risk management capabilities.

The business uses various methods to quantify risk and where applicable it also receives external input on exposures (e.g. periodic reviews with reinsurers). This is supported with additional tools from the RMF such as stress testing, and key risk indicators.

The BoD has the overall responsibility for the assumption, monitoring and management of risks. The below issues form part of the Company's Risk Register or its ORSA heat map and are identified, assessed and managed:

- Investment (Market) Risk
- Counterparty Default (Credit) Risk
- Life Underwriting Risk
- Health Underwriting Risk
- Operational Risk
- Business (Strategic) Risk
- Liquidity Risk
- Asset – Liability Risk
- Reputational Damage
- Climate Risk effects
- Any other Risk the Company identifies to be exposed to

ORSA Process

The ORSA forms a core component of the Company's risk management system and comprises of all the procedures and measures adopted with the purpose of ensuring the following:

- Appropriate identification and measurement of risks
- An appropriate level of internal capital (the capital that is considered adequate for the coverage of the risks inherent in the business model and activities of a company, for Pillar 1 and 2 purposes. This level of capital is determined by the Company by the application of internal risk assessment methodologies) in relation to the Company's risk profile
- The application and further development of suitable risk management and internal control systems

The Company has in place an entirety of processes determining the Company's overall solvency needs, the use of risk within decision making and the means of ensuring the adequacy of Own Funds to underpin the business strategy. The outcome of this process is recorded in an ORSA report under the responsibility of the CRO. The Company's ORSA Policy was reviewed and revised during the reporting period.

In December 2022, the Company submitted its ORSA Report to the Bank of Greece. The ORSA Report explained in detail how the Company has implemented and embedded the ORSA within its business, describing its risk profile and the degree of risk appetite that the Company is willing to endure as well as the capital that it considers as adequate to be held against the risks that it is exposed to.

B.4. Internal Control System and Compliance

For CNP Zois the Internal Control System is the aggregate of control mechanisms and procedures which covers the Company's key activities and contributes towards the efficient and sound operation. The Internal Control System comprises of key preventative or corrective controls and more specifically aims at achieving the following objectives:

- Contributes to the consistent application of the risk management framework, through the efficient utilization of all available resources
- Ensures the business has a well-designed and communicated risks and controls assessment process to inform management of key issues. This will include:
 - The identification and management of key risks assumed and the safeguarding of the Company's assets and reputation, and:
 - The identification and management of key controls to ensure the safeguarding of the Company's assets and reputation.
- Ensures the business has a controls assessment process that has reliable independent testing and appropriate audit trails, to evidence that assessments and status reports are appropriate.
- Ensures there are appropriate controls and governance to ensure the completeness and reliability of data and information which are necessary for the correct and up-to-date determination of the financial position and the production of reliable financial statements
- Compliance with the legal framework which governs the Company's operations, including internal rules and codes of ethics
- Prevention and avoidance of any operations which could endanger the reputation and interests of the Company, its shareholders and its counterparties.

Internal Control System is effected in multiple levels within the Company across its three lines of defence organisational arrangements.

At CNP Zois, the BoD has the final responsibility for the design, implementation / application and maintenance of the Internal Control System.

For each key process, internal control is embedded either in the manual procedures or automated procedures and systems in order to ensure an effective system of internal controls.

The following processes were established and form an integral part of CNP Zois' Internal Control System:

- Strategic objectives and corporate values which are disseminated throughout the Company
- Clear hierarchy and lines of responsibility, accountability and segregation of duties to the extent possible due to its size via its organizational arrangements
- Composition of the Board and Committees
- The three lines of defence philosophy is embedded in the organizational structure
- Documented Policies and Procedures for the key activities
- Terms of Reference for the established Committees
- Fit and Proper Requirements for key persons charged with governance
- Code of Conduct and Code of Ethics for all members of staff
- Risk Management embedded in the processes
- Information Technology Systems (including accounting) to monitor transactions
- Reporting Mechanisms to the Board of Directors and to the Authorities
- Utilisation of the work conducted by internal and external auditors as well as other control functions such as compliance, actuarial, risk
- Contingency / Business Continuity and Disaster Recovery Arrangements

The processes are under continuous review for improvement opportunities and apply for the below business areas:

- Reserving
- Actuarial Valuations
- Underwriting
- Reinsurance
- Investment Management
- Claims Handling
- Sales & Customer Service
- Accounting
- IT
- Information Security
- Risk Management
- Human Resources
- Legal & Compliance
- Audit

The Internal Audit Function (IAF), in the 3rd organisational line of defence, has the right to assess the appropriateness, efficiency and effectiveness of the Company's internal control environment and reports its observations and recommendations to the Audit & Risk Committee. The Internal Audit activity is carried out in accordance with the audit plan pre-agreed with the Audit & Risk Committee.

Compliance

CNP Zois has an established and maintained a permanent and effective Compliance Function from its holding company CNP CIH.

The appointed Compliance Officer and Compliance Function Holder is Mariel Ekkeshis.

The responsible person for overseeing the outsourced Compliance activities in the year 2022 was Charoula Syrigonaki.

The Compliance Function decodes new and proposed (financial services / insurance) compliance-related rules from legislative or regulatory bodies, which are relevant to business, into internal standards, procedures, and guidelines.

The Compliance Function remained independent of risk-taking functions and reported to the Company's CRO. The Compliance Officer also had a direct reporting line to the BoD via the Audit and Risk Committee of the BoD to escalate important issues and a functional reporting line to the Group Compliance Function of CNP Assurances.

The main responsibility of the Compliance Function is the establishment and application of suitable procedures for the purpose of achieving a timely and on-going compliance of the Company with the existing legal and regulatory framework. The activities and responsibilities of the Function are governed by the Compliance Charter, Compliance Policy and Compliance Manual, which are approved by the BoD and reviewed annually.

The key role of the Compliance Function is to proactively:

- Identify, assess and monitor the compliance risks faced by the Company
- Identify, assess and advise on the potential impact to the actions of the Company from changes in the legal framework
- Assist, support and advise line management in fulfilling its compliance responsibilities

In performing its above role, the Compliance Function has the objective to enable the Company to demonstrate to the regulatory authorities' compliance with applicable regulations and thus to:

- Protect the good reputation of the Company
- Avoid disciplinary action by the regulators
- Avoid criminal sanctions

Compliance risk sources within the scope of the Compliance Function are recognised by the Company as:

- Anti-Money Laundering/ Customer Acceptance/ Sanctions
- Privacy and Data Protection
- New Products and Services
- Customer Complaints and all complaints against the Company, employees and associates
- Marketing and Sales Practices
- Conflicts of Interest
- Confidentiality
- Outsourcing Services
- On-line presence and corporate communication
- Internal and External Codes of Conduct
- Regulatory Relationships
- Protection of Competition
- Insurance Legislation
- Corporate Governance
- Anti-bribery and Corruption
- Regulatory framework
- Internal and external Fraud
- Whistleblowing
- Product Oversight and Governance
- Economic and Financial Sanctions
- Any other risk deemed applicable

The sources of risk are categorised into key risks, in the Company's risk register. The Company's policies for the key areas of compliance (Anti-Money Laundering, Code of Conduct, Conflict of Interest, Confidentiality, Whistleblowing, Product Oversight and Governance, Economic and Financial Sanctions, Anti-Bribery and Corruption, Gifts & Benefits, Protection of personal data, Fraud Prevention) were revised and approved by the BoD in the year.

The approved by the Audit & Risk Committee risk-based Compliance Plan was implemented with results being reported to the Audit and Risk Committee of the BoD.

B.5. Internal Audit

The Internal Audit Function is currently outsourced to Deloitte Cyprus. The appointed Internal Auditor is Panicos Papamichael, Partner at Deloitte Cyprus. The responsible person for overseeing the outsourced Internal Audit activities is Panayiotis Kylilis (Financial Controller).

The IAF remained independent and autonomous and provided an independent assessment of the risk framework and internal control processes.

To ensure the organisational independence of the IAF, the Internal Auditor reports significant findings and any other matters to the Audit and Risk Committee of the Board of Directors. The Audit and Risk Committee is responsible for Internal Audit as part of its internal control structure and was ultimately responsible for the direction and approval of the scope of work performed by the internal audit team in 2022.

The IAF is independent of risk-taking functions and reports administratively to the Company's CEO. The IAF also has a direct reporting line to the BoD via the Audit & Risk Committee of the BoD and a functional reporting line to Group Internal Audit Function of CNP Assurances.

The Company's Internal Audit policy and principles are outlined in the Internal Audit Charter and the Internal Audit Manual which are approved by the Audit and Risk Committee of the BoD and reviewed at least annually for their adequacy. The Company's Charter and Manual were approved by the BoD in the year.

The IAF takes a risk-based approach in deciding its priorities. The steps in the Internal Audit Methodology are the below:

- Understand the Company's business, industry, processes, locations, and specific business objectives
- Execute the internal audit plan and/ or carry out substantive testing that will be determined by the Audit & Risk Committee
- Conduct follow-up visits to evaluate the implementation of agreed upon recommendations
- To liaise with the risk management, actuarial and compliance functions and take into consideration their assessment of identified risks when formulating the internal audit plan
- Conduct any special tasks or projects as requested by the Audit & Risk Committee
- Report to the Management and the Audit and Risk Committee on identified deficiencies in control measures and of recommendations for improvement
- Submit to the Audit & Risk Committee an annual / periodic report regarding the audit activity and the

(progress of) implementation of internal and external audit recommendations

- Inform the Audit & Risk Committee periodically about the latest developments and best practices in the field of internal auditing

B.6. Actuarial Function

The Actuarial Function of the Company is responsible for coordinating all actuarial activities.

The appointed by the BoD Actuarial Function Holder is Eftstathia Yiannopoulou.

The Actuarial Function is independent of risk-taking functions and reports to the Company's General Manager. The Actuarial Function also has a direct reporting line to the BoD via the Audit & Risk Committee of the BoD and a functional reporting line to the Group Actuarial Function of CNP Assurances.

The Actuarial Function is involved in first and second line of defence activities. Its responsibilities in the reporting year included:

- Coordination of the calculation of technical provisions for SII purposes and mathematical reserves under current IFRS scheme
- Ensuring the appropriateness of the methodologies and underlying models used as well as the assumptions made in the calculation of technical provisions for SII purposes and mathematical reserves under current IFRS scheme
- Assessing the sufficiency and quality of the data used in the calculation of technical provisions
- Comparing best estimates against experience
- Assessing the Company's capital needs via the standard formula model
- Building and providing pricing tools and support to the business
- Informing the Senior Management on each quarter's SII results, assumptions, and any other topics as agreed through the relevant Company's policies
- Informing the BoD of the reliability and adequacy of the calculation of technical provisions
- Expressing an opinion on the overall underwriting policy
- Expressing an opinion on the adequacy of reinsurance arrangements
- Contributing to the effective implementation of the risk-management system, in particular with respect to the risk modelling underlying the calculation of the capital requirements and to the ORSA
- Contributing for and monitoring the preparation of QRTs under Pillar III
- Contributing to the effective implementation of the risk-management system, in particular with respect to the risk modelling underlying the calculation of the capital requirements and to the ORSA

The Board of Directors was kept informed on all actuarial matters and exposures. In 2022, the Company's actuarial policy and Report were approved by the BoD.

B.7. Outsourcing

The Company has in place an Outsourcing Manual setting out the Outsourcing Policy and procedures ensuring the on-going compliance with the requirements of the SII Directive with respect to the effective control and management of risks associated with the outsourced services.

The main objectives of the Manual are:

- To ensure that a consistent approach is taken to all decisions regarding the possibility of outsourcing any activities or functions
- To give adequate consideration to the risks involved
- To establish a framework for the management of outsourced services, ensuring that appropriate controls are exercised

The BoD approves any amendments to the Policy Manual and all critical or important outsourcing activities or functions. The key determinant to define a critical or important outsourcing arrangement is whether a function or activity is fundamental to the Company's ability to carry out its core business and the impact it has on the Company.

The Company outsourced externally the key functions / activities of Internal Audit, IT Infrastructure, Claims Handling, Fund Management/Custody, Health & Safety and Storage Services.

The Company also received support from its parent company CNP CIH in the areas of Risk Management, Actuarial Compliance, Legal, Investments, Business Continuity Management, Human Resources, Information Security, Marketing, the "Data Protection Officer" services and Information Technology Systems and Services.

CNP Zois remains fully responsible for all outsourced functions and activities. The Company has included in its risk management systems and controls a process for monitoring and reviewing the quality of the service provided.

C. Risk Profile

CNP Zois is exposed to Pillar 1 risks which are explicitly assessed through Pillar 1; market, counterparty default, life underwriting, health underwriting and operational risk calculated by the standard formula as well as risks not fully covered by Pillar 1 such as strategic, business, liquidity, legal and compliance and reputational. The type of risks which the Company is exposed to, have not changed significantly over the course of the year.

Pillar 2 considers, in addition to the minimum regulatory capital requirements for Pillar 1 risks, any supplementary requirements for those risks as well as any requirements for risk categories not captured by Pillar 1. The risk categories to be covered under Pillar 2 depend on the specific circumstances of an insurance company and the nature and scale of its business.

The Company conducts an annual ORSA to determine a forward-looking assessment of the Company's capital requirements given the Company's business strategy, risk profile, risk appetite and capital plan. As part of the CNP Zois ORSA, a range of stress tests are applied to the Company's base capital plan. The ORSA is approved by the BoD, which has the ultimate responsibility for the effective management of risk and approval of the Company's risk appetite.

The ORSA is reviewed by the Bank of Greece as part of its supervisory review and evaluation process which occurs periodically.

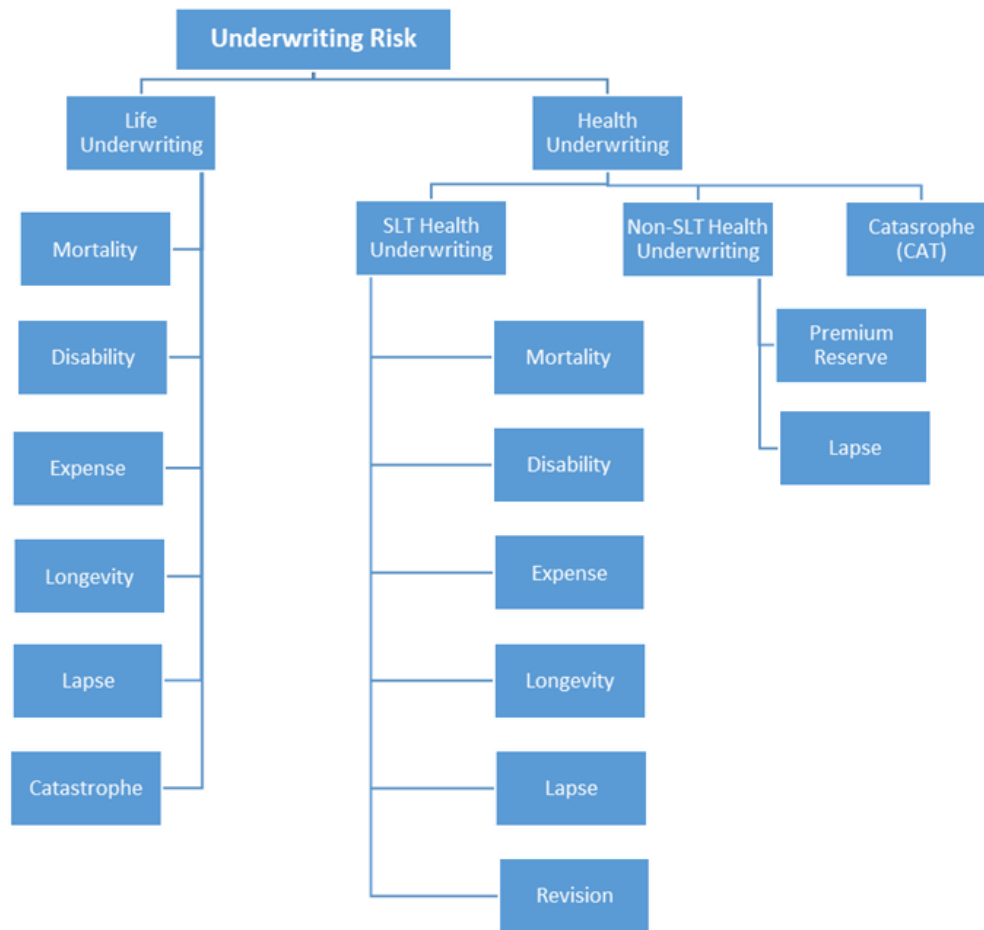

The RMF has an ongoing process in place to identify, assess and manage the Company wide risks. Appropriate reporting takes place through the agreed governance structure of the Company.

In Thousands €	SII EOY 2022
SCR Coverage Ratio	279%
MCR Coverage Ratio	175%
Own Funds	6.982
MCR	4.000
SCR	2.500
BSCR	2.300
SCR Operational	200
SCR Market	2.103
SCR Life	64
SCR Health	249
SCR Counterparty	308

The SII capital position of CNP Zois under normal and stressed scenarios (excluding extreme risks that did not materialise) was adequate to support its capital and business goals in the reporting year 2022.

The Company's BoD approves the SII coverage ratio and examines the Company's profile both from regulatory and economic capital viewpoints.

C.1. Underwriting Risk

Underwriting risk is the risk of loss or unfavourable change of the value of the liabilities of insurances resulting from an increase of the claim rate not anticipated during the pricing or during the acceptance of the risks.

The underwriting risks quantified under Pillar 1 are Life and Health underwriting risks, which are the risks arising from the life and health insurance obligations, in relation to the perils covered as well as the processes used in the conduct of business. They include the risk resulting from uncertainty included in assumptions about exercise of policyholder options like termination options.

The Life and Health underwriting risk modules take account of the uncertainty in the results of undertakings related to existing insurance and reinsurance obligations as well as to the new business expected to be written over the following 12 months.

A standardised approach in line with the European Insurance and Occupational Pensions Authority (EIOPA) specifications was followed by the Company for calculating the solvency capital requirement for life and health underwriting risks looking at the sub-modules shown below.

Mortality Risk

Mortality risk is the risk of loss resulting from a change in value caused by the actual mortality rate being higher than the one expected.

Disability Risk

Disability risk is the risk of loss resulting from a change of value caused by a deviation of the actual randomness in the rate of insured persons that are incapable to perform one or more duties of their occupation due to a physical or mental condition, compared to the expected randomness.

Expense Risk

Expense risk is the risk of loss resulting from a change in value caused by the fact that the timing and/or the amount of expenses incurred differs from those expected.

Longevity Risk

Longevity risk is the risk of loss resulting from a change in value caused by the actual mortality rate being lower than the one expected.

Lapse Risk

Lapse risk is the risk of loss resulting from fluctuations in the frequency of policy lapses.

Premium Risk

Premium risk is the risk of loss resulting from fluctuations in the timing, frequency and severity of insured events. It relates to policies to be written (including renewals) during the period and to unexpired risks on existing contracts. Premium risk includes the risk that premium provisions turn out to be insufficient to compensate or need to be increased. It also included the risk resulting from the volatility of expense payments. Expense risk is implicitly included as part of the premium risk.

Reserve Risk

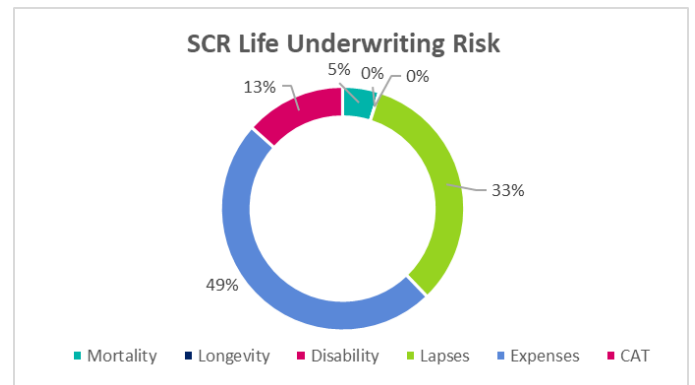

Reserve risk is the risk of loss resulting from fluctuations in the timing and amount of claims settlements.

Catastrophe Risk

Catastrophe risk (CAT) is the risk that a single event or series of events, of major magnitude, usually over a short period, leads to a significant deviation in actual claims from the total expected claims.

Life Underwriting Risk

The capital requirement for Life Underwriting risk is the sum of the life underwriting risk components plus the diversification effect between the components. The life underwriting risk components are the mortality risk, longevity risk, disability risk, lapse risk, expenses risk and CAT risk.

Expense Risk contributed the greatest to the Life Underwriting risk of the Company with 49%. The impact of diversification was around 23%.

Health Underwriting Risk

The capital requirement for Health Underwriting risk is the sum of the Health Underwriting risk components plus the diversification effects. The Health Underwriting risk components are the similar to life technique underwriting risk (SLT), the non-similar to life technique health risk (NSLT) and the health CAT risk.

Health CAT risk contributed the greatest to the Health Underwriting risk with 60%. The impact of diversification is around 20%.

Changes over the reporting period

There were no material changes over the reporting period regarding the Company's portfolio of insurance products. The Company is confronting with the unfavourable environment, Covid 19 pandemic created and the high inflation rates the Ukrainian crisis brought along.

Regarding the SCR calculation, during the fourth quarter of 2022 and upon the regulator's request, respective SCR Longevity has been calculated, resulting to a minor impact as stipulated below.

The SCR per risk as described above for the years ended 2022 and 2021 are shown below:

In Thousands €	SCR Life	
	31/12/2022	31/12/2021
Mortality	4	10
Longevity	0	0
Disability	0	1
Lapse	27	229
Expenses	40	56
CAT	11	25
<i>Diversification</i>	-18	-50
SCR Life Underwriting	64	270

The SCR Life has decreased by 76% compared to the previous reporting period with Lapse risk being the greatest contributor to this decrease in the year with 88% (€202k), mainly due to business development and the higher interest rate environment being beneficial for products with guarantees.

In Thousands €	SCR Health	
	31/12/2022	31/12/2021
SLT Health Underwriting	6	8
NSLT Health Underwriting	118	151
Health CAT	189	101
<i>Diversification</i>	-64	-54
SCR Health Underwriting	249	205

The SCR Health has increased by 21% mainly due to an increase of €88k (87%) recorded in Health CAT risk.

This increase in Health CAT risk was due to the increase in the accident concentration risk component and its effect to the small size of the Company's portfolio.

The increase of SCR Health was partially offset by the decrease in NSLT Health Underwriting risk by 22%. The respective decrease was due to the lower premiums in Health NSLT business compared to 2021, leading to lower premium risk.

Risk Mitigation

Underwriting risk (including life and health risks) is taken on in line with the Company's underwriting and pricing expertise, to provide an appropriate level of return for an acceptable level of risk. The Company has a preference for those risks which are part of its core activities.

The Company's underwriting objective is to maximize earning levels and minimize volatility of earnings, while ensuring that the Company is appropriately compensated for the risks it assumes. This objective is constrained by the Company's target solvency position and the material risks that the Company is exposed to.

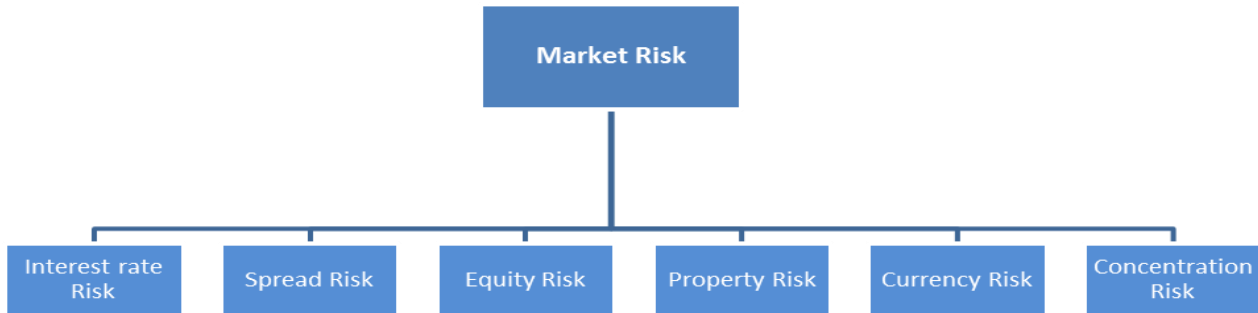

Underwriting discipline and a robust governance process is at the core of the Company's underwriting strategy. The risks arising from underwriting are managed, monitored, reported and controlled in accordance with the Company's overall governance arrangements, which follow the management and oversight of the Company's exposure to underwriting risk.

In the course of the year, CNP ZoIs has maintained adequate reinsurance arrangements. The reinsurance covers of the Company are both proportional and non-proportional as outlined below.

Reinsurance Treaty	Type of Reinsurance arrangement	Insurance Covers
Individual Life	Proportional - Surplus	Life, TPD, AD&D, WoP
New Individual Life	Proportional - Surplus	Life, TPD, AD&D, WoP
Credit Life	Proportional - Surplus	Life, TPD, AD&D, WoP
Group Life	Proportional - Surplus	Life, TPD, AD&D, WoP, Lol, HDA, MedEx
Critical Illness	Proportional Surplus	Critical Illness benefits
Cat XL	Non Proportional	Life, TPD, AD&D,
Medical XL	Non-Proportional	Secondary Health Insurance

During the course of its ORSA process, the Company carried out a Central scenario, ORSA Upward scenario, ORSA Downward scenario and additional Company specific scenarios, including a qualitative Climate Risk scenario.

C.2. Market Risk

Market risk is defined as the risk of loss or of adverse change in the financial situation resulting, directly or indirectly, from fluctuations in the level and in the volatility of market prices of assets, liabilities and financial instruments.

The market risks quantified under Pillar 1 refer to fluctuations that may arise in interest rates, equities, foreign exchange rates (currency) and property as well as spread and concentration risks. Concentration risk relates to all risk exposures with a loss potential which is large enough to threaten the solvency or the financial position of a Company.

All investment assets’ default risk with the exemption of cash is shocked under concentration and spread risk of market risk. The cash is shocked under counterparty default risk.

These market risk factors may affect a Company’s income and the value of its holdings in financial instruments.

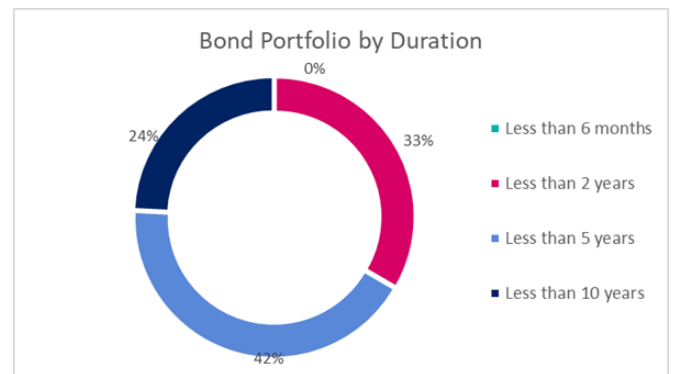

CNP Zois has followed a standardised approach in line with the EIOPA specifications for calculating the solvency capital requirement for market risk looking at the sub-modules shown below.

Interest Rate Risk

Interest Rate risk is the risk of a change in value caused by a deviation of the actual interest rates from the expected interest rates.

On the asset point of view, to calculate the Interest Rate risk the Company estimates the value for each security held separately before and after the shock as described in the standard formula. For individual securities the Company adds the implied yield increase or decrease (depending on the shock) to the actual yield of the asset in order to estimate the market value of the specific asset after the shock.

The figure below shows the mutual funds bond portfolio of the Company by duration:

Equity Risk

Equity risk is the risk of a change in value caused by deviations of the actual market values of equities and/or income from equities from their expected values.

For the Equity risk, the Company uses the standard formula which applies a 39% shock for Type 1 equities and 49% shock for Type 2 equities plus the systematic adjustment. Type 1 equities are the equities listed in regulated markets in countries which are members of the European Economic Area (EEA) or the Organisation for Economic Cooperation and Development (OECD). Type 2 equities are equities listed in stock exchanges in countries which are not member of the EEA or the OECD, equities which are not listed, commodities and other alternative investments.

The Company has exposures to Type 1 and Type 2 Equity risk through its mutual fund holdings. The exposure by Equity Type is presented below:

Property Risk

Property risk is the risk of financial loss occurring as the result of owning a real estate investment.

For the Property risk, the Company applies a 25% shock on all assets which are exposed to property (25% decrease in price) as described in the standard formula.

The Company has exposure in Property risk via property funds.

Spread Risk

Spread risk is the risk of a change in value due to a deviation of the actual market price of credit risk from the expected price of credit risk.

For the Spread Risk calculation, the Company uses for its Funds the value for each underlying bond before and after the shock as described in the standard formula.

The table below illustrates the credit rating of the bond and money market funds portfolio of the Company.

Credit Rating	Direct Exposure €k	Indirect Exposure €k	Exposure in %
AA	495	0	2,39%
A	0	5.305	25,59%
A-	1.890	0	9,12%
BBB+	1.578	0	7,61%
BBB	6.841	3.680	50,76%
BBB-	941	0	4,54%
BB	0	0	0%
BB or lower	0	0	0%
Total	11.745	8.985	100,00%

Currency Risk

Currency risk is the risk of a change in value caused by the fact that actual foreign currency exchange rates differ from those expected.

For the Currency risk, the Company applies a 25% shock on all assets which are exposed to currency risk (the larger impact of a 25% appreciation or depreciation of the foreign currency against the local currency) as described in the standard formula.

The Company is exposed to currency risk through its investment in mutual funds.

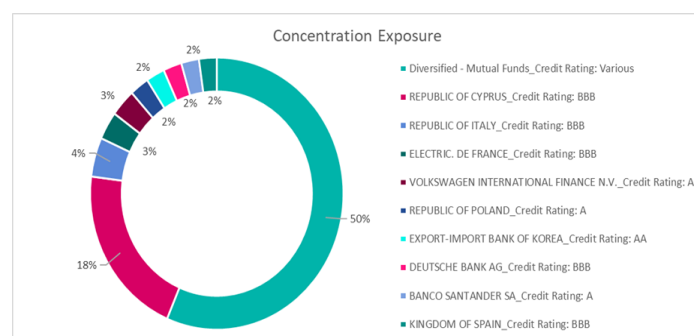

Concentration Risk

Concentration risk is the risk of exposure to increased losses associated with inadequately diversified portfolios of assets and/or obligations.

For the Concentration risk the Company uses the standard formula to calculate the risk that arises from concentrated exposure to a single issuer.

In the reporting period the Company's investment decisions have diverted the emphasis towards yield and capital protection. As a consequence, there was a high increase in concentration risk for a few months.

The figure below illustrates the highest exposures to a single issuer where their risk is borne by the Company:

As shown above there is no material concentration risk in the reporting period due to the Company keeping its portfolio diversified and the majority in mutual funds in order to avoid high concentration to a single issuer.

Changes over the reporting period

The Company follows conservative asset management for its investible assets always with the ultimate objective to preserve its capital position. Despite the extraordinary economic situation arising from the pandemic outbreak, the losses on the investible assets under management to date were moderate.

The Company continuously monitors its investment risks through the revision of its TAA and takes action as necessary. The risks from investments affect the ability of the Company to keep the returns promised to its customers as well as pay a return to its shareholders. Unexpected risks exposures are currently covered by own funds.

The total exposure per risk as described above for the years ended in 2022 and 2021 is shown below:

	Exposure	
	31/12/2022	31/12/2021
Interest Risk	20.730	19.753
Spread Risk	20.730	19.753
Equity Risk Type 1	172	193
Equity Risk Type 2	358	283
Property Risk	2.582	2.798
Currency Risk	307	228
Concentration Risk	23.469	22.730

Total investible assets of the Company have increased in terms of market value compared to previous year as a result of the share capital increase, with corresponding increase on interest rate, spread and concentration risks.

The SCR per risk as described above for the years ended in 2022 and 2021 is shown below:

In Thousands €	SCR Market	
	31/12/2022	31/12/2021
Interest Rate	1.053	486
Equity	215	232
Property	645	700
Spread	1.148	1.154
Concentration	299	659
Currency	77	57
<i>Diversification</i>	<i>-1.334</i>	<i>-1.269</i>
SCR Market (After Diversification)	2.103	2.019

The SCR Market Risk has increased by 4%. The significant increase observed in Interest rate is mainly due to the significant upward shift of the yield curves, especially in the short term. This effect was partially offset by the decrease in Concentration risk due to the expiration of a fixed deposit.

The impact of diversification is around 39%.

Risk Mitigation

Risks arising from investments are monitored and controlled through the use of risk limits and via robust governance.

The Company uses its TAA to match assets and liabilities in the best possible way allowing for the different objectives (return vs risk) and controlling the market SCRs.

Monitoring Investment risk exposures is a joint responsibility between the three lines of defence in the Investment risk management framework, consisting of prudent and regular review of risk metrics and exposures. All risk monitoring is undertaken in the context of the overarching limit structure, and any limit breaches are quickly and promptly escalated to the required parties.

The BoD bears ultimate responsibility for setting the investment risk strategy and appetite and for the management of the investment risk. The Investment Committee is the BoD's delegated authority to develop and oversee the implementation of the Company's investment strategy, policies and procedures as well as for ensuring the investment decisions are made in a prudent manner and are within the BoD's risk appetite. The Committee provides challenge on investment decisions and on the risks associated with them.

During the course of its ORSA process, the Company carried out a Central scenario, ORSA Upward scenario, ORSA Downward scenario and additional Company specific scenarios, including a qualitative Climate Risk scenario.

C.3. Counterparty Default Risk/Credit Risk

The Counterparty Default Risk is the risk to incur a possible loss due to unexpected default or deterioration in the credit standing of the counterparties and debtors of insurance and reinsurance undertakings over the following 12 months.

This type of risk can reduce the amount of future cash inflows from financial assets on hand at the reporting date.

The Company follows a standardised approach in line with the EIOPA specifications for calculating the solvency capital requirement for counterparty default risk.

The figure below shows the split of SCR Counterparty between the 2 types:

Type 1 exposures consist of the following:

- Risk-mitigation contracts
- Cash at bank
- Deposits with ceding undertakings, where the number of single name exposures does not exceed 15
- Commitments received which have been called up but are unpaid, where the number of single name exposures does not exceed 15
- Legally binding commitments which the company has provided or arranged, and which may create payment obligations depending on the credit standing or default on counterparty

Type 2 exposures consist of all credit exposures which are not covered in the spread risk sub-module, and which are not type 1 exposures, including the following:

- Receivables from intermediaries
- Policyholder debtors
- Mortgage loans
- Deposits with ceding undertakings where the number of single name exposures exceeds 15
- Commitments received which have been called up but are unpaid where the number of single name exposures exceeds 15

The Company is inherently unable to predict all developments which could have impact on this risk; albeit it takes the necessary measures to contain the risk at acceptable levels.

Changes over the reporting period

The total exposure per risk as described above for the years ended in 2022 and 2021 is shown below:

In Thousands €	Counterparty Risk	
	31/12/2022	31/12/2021
Counterparty Type 1	252	529
Counterparty Type 2	70	9
<i>Diversification</i>	-14	-3
SCR Counterparty	308	535

Counterparty Risk has decreased by 42% over the reporting period. The decrease by €227k is due to overall decrease in cash balances.

This was partially offset by the increase in Type 2 exposure and overdue premiums by more than three months due to uncollected premiums which are planned to be collected within the first quarter of 2023.

Risk Mitigation

The Company has policies to limit the counterparty default risk by reviewing the credit standing of its reinsurers as well as the level of deposits in reputable financial institutions with good credit standing.

Cash exposures are diversified in order to ensure that the counterparty risk remains at acceptable low levels.

In the reporting period the Company's investment decisions have diverted the emphasis towards yield and capital protection.

Receivables are individually assessed on an ongoing basis for impairment and where deemed necessary a provision is recognised in the Company's financial statements.

The Company's Board of Directors is being informed on counterparty exposures and specific actions are followed up. In addition to the Central scenario, the Company performed scenarios and sensitivity analysis stressing the Company's capital adequacy.

During the course of its ORSA process, the Company carried out a Central scenario, ORSA Upward scenario, ORSA Downward scenario and additional Company specific scenarios, including a qualitative Climate Risk scenario.

C.4. Liquidity Risk

Liquidity Risk is the risk of not being able to make payments as they become due because there are insufficient assets in cash form or that can easily be turned into cash at no excessive cost.

This risk may arise when the Company is unable to realise investments and other assets in due time to meet its obligations as well as from significant asset / liability mismatches in relation to duration, currency, nature and timing.

Liquidity Policy and Monitoring Procedures

CNP Zois ensures that we maintain sufficient liquid financial resources to meet its obligations as they fall due through. There is a liquidity risk appetite which requires that sufficient resources be maintained for the Company to manage its day-to-day operations in the short, medium and long term as well as sufficient buffer of liquid assets for covering sudden liquidity demands that may arise.

Asset Liability Matching (ALM) is performed to monitor this risk and specific thresholds and stresses are also executed. The duration of the Company's liabilities is considered in the Investment decisions.

An ALM dashboard for normal and stressed market conditions is prepared in line with the Company's Asset Liability Matching Policy and presented quarterly to the Risk & Reserving Committee and the Audit & Risk Committee.

On the asset side the Company's liquidity risk remained low as the Company's portfolio included high traded equities as well as mutual funds with fund managers offering daily liquidity and cash.

In the unlikely event of liquidation, 100% of the Company's portfolio may be fully liquidated within one week.

C.5. Operational Risk

Operational risk is the risk of loss arising from inadequate or failed internal processes, or from people and systems, or from external events.

It includes legal and compliance risk, which can be defined as the risk of loss arising from non-compliance with laws and regulations, contracts, established practices or codes of conduct, but excludes strategic and reputational risks.

The Company continuously operates, validates and enhances its key operational controls arising from inadequate or ineffective internal processes, people and systems or from external events.

The regulatory environment is fast changing and imposes significant demands on the resources of the Company.

In terms of operational issues, the Company has a moderate appetite for risk. Resources are available to control operational risks to acceptable levels and maintain an operational policy. Other risk mitigants include internal controls, insurance and business continuity plan arrangements.

Internal Fraud

CNP Zois takes all allegations of suspected fraud or corruption perpetrated by its employees very seriously and such are considered and responded fully and fairly as set out in the Code of Conduct. The Company has implemented an electronic tool for Whistleblowing.

External Fraud

CNP Zois takes all allegations of suspected fraud or corruption perpetrated by people outside the Company very seriously and such are considered and responded fully and fairly.

Security of Property and Persons

The Company strives to provide a highly secure environment for its people and assets by ensuring its physical security measures meet high standards.

Work Health & Safety – The Company aims to create a safe working environment for all its employees.

Products, Contracts and Customer Relationship

The Company takes very seriously those incidents arising from an unintentional or negligent failure to meet a professional obligation to clients (including fiduciary and

suitability requirements); as well as low appetite for losses linked to the nature or design of a product.

Project Management

The Company carefully examines losses arising from failed management of projects either performed by internal resources or from external vendors and service providers.

IT Dysfunctions

Information Technology (IT) risks cover both daily operations and on-going enhancements to the Company's IT systems. These include:

- Processing – Prolonged outage of core systems: The Company ensures the availability of systems which support its critical business functions thus maximum recovery times have been identified and agreed with each business area.
- Security – external or internal attacks on core systems or networks: The Company aims for strong internal control processes and the development of robust technology solutions. The Company has enhanced its information security organizational arrangements.
- On-going Development: The implementation of new technologies creates new opportunities, but also new risks. The Company carefully reviews IT system-related incidents which are generated by poor change management practices.

Legal & Compliance

The Company is committed to a high level of compliance with relevant legislation, regulation, industry codes and standards as well as internal policies and sound corporate governance principles. Identified breaches of compliance will be remedied as soon as practicable.

All legal subjects and court proceedings are handled diligently in the normal course of the business.

Execution, Delivery and process management

The Company is committed to ensuring that its information is authentic, appropriately classified, properly conserved and managed in accordance with legislative and business requirements.

Human Resources management

Calibre of People: The Company relies on high quality employees to perform its functions. It aims to create an environment where employees are empowered to the full extent of their abilities.

Conduct of People: The Company expects employees to conduct themselves with a high degree of integrity, to strive for excellence in the work they perform and the outcomes they achieve, and to promote the client’s interest. The Company takes very seriously any breaches of its Code of Conduct.

Changes over the reporting period

A standardised approach in line with the EIOPA specifications for calculating the solvency capital requirement for operational risk as presented in the below table. This approach takes into consideration the earned premiums as well as the technical provisions of the Company which does not necessarily capture the full definition of the operational risk as stated above.

The regulatory environment is fast changing and imposes significant demands on the resources of the Company. We have recently seen a large number of new guidelines or legislation coming into effect. The risk of the Company is mitigated via assistance by the CNP CIH Group.

In Thousands €	SCR Operational	
	31/12/2022	31/12/2021
SCR Operational	200	227

The Company takes appropriate and timely steps to prevent and mitigate undue operational risk and financial loss due to weaknesses in processes, people and systems.

It continuously aims to improve further the operational risk framework and all loss events are promptly captured for appropriate action to be taken and promote internal learning.

During the course of its ORSA process, the Company carried out a Central scenario, ORSA Upward scenario, ORSA Downward scenario and additional Company specific scenarios, including a qualitative Climate Risk scenario.

C.6. Other Material Risks

Business Risk

Business risk arises because capital is risk sensitive and may vary as business cycles and conditions fluctuate over time.

CNP Zois continuously examines market conditions to which the business is exposed to, and continuously identifies the key sources of risks.

Reputational Damage

Reputational risk could arise from an adverse perception of the image of a company on the part of customers, counterparties, shareholders, media speculation and negative publicity, supervisory authorities and any other stakeholders.

This risk is not ignored by the Company and at an early stage we seek to identify prevent, manage and constraint any threat to its brand or reputation.

Strategic Risk

The strategic risk could occur as a result of adverse business decisions, improper implementation of decisions or lack of responsiveness to changes in the business environment. This risk could impose material threats on the Company’s current and prospective earnings.

The BoD is promptly informed on all risk exposures that may arise and where needed action is taken.

Climate Change Risk

Climate change is a global emerging risk and can impact the operation of a Company through Physical and Transition Risks. Physical risks are risks resulting from damages caused directly by climate phenomena and can be classified as acute and chronic. Transition risks relate to risks associated to transition to a lower-carbon and more climate friendly economic activities. Transition risks include regulatory risk, liability risk as well as reputational risk.

CNP Zois could be mainly impacted from Climate Change risk through Market, Underwriting and Operational risk.

Market risk can be impacted through Physical and Transition risk on the asset side. The Physical risks relate to the risks that CNP Zois invests in industries that are highly exposed to climate related physical risks such as properties in hurricane affected areas and forestry or farmland that maybe impacted by droughts. As for the Transition risks, the Company would be exposed to these risks if it invests in industries that are highly exposed to and expected to be

impacted by climate related legislation or social and investment movements, for instance infrastructure industry, oil, and gas etc.

Risk temperatures, changing seasonal rainfall patterns, and drought conditions could have an impact on people's lifestyles and may result in substantial increased disruption to health care provision and services. As temperature increases, this can have a subsequent effect on the number of premature deaths as a result of heat related illnesses as well as significant health impacts due to various other reasons. New pandemics are also predicted as a result of increasing temperatures and thawing of ice which can increase the Underwriting losses.

As for the Operational risks, they can occur if the Company's premises are located in an area that may be impacted by fire, flood, drought, tornadoes etc. Furthermore, operational risk can occur where the Company is not taking into account the emerging legislative, social and shareholder expectations on the topic of climate change, thus leading to fines and penalties/ poor reputation.

The Company does not disregard these risks and has been working to mitigate and manage them and take action when appropriate.

During the course of its ORSA process, the Company carried out a Central scenario, an ORSA Upward scenario, an ORSA Downward scenario and additional Company specific scenarios, including a qualitative Climate Risk scenario.

C.7. Other Information

The invasion of Russian troops on Ukrainian territory which occurred on 24 February 2022, caused a context of great international instability, the outcome of which no one knows today.

For all the economic players and for the States involved in this crisis, the conflict characterizes a systemic risk which exacerbates particular risks already well identified. Depending on the duration of the conflict and its outcome, the inflationary risk could be aggravated due to a sharp increase in energy prices (oil and gas in particular), also due to a shortage of cereals. It is expected that Central banks will further try to control the inflationary risk by modulating interest rates while avoiding the trap of stagflation.

In addition, the cyber threat is expected to intensify. CNP Zois in collaboration with CNP Assurances group has been investing and working for several years to strengthen its risk management system and its resilience.

CNP Zois adopted the sanctions taken against Russian persons or entities. The Company has no exposure to Russia and its nationals and at this stage, no insurance policies taken out by Russian citizens that are targeted by the sanctions have been identified. The situation is constantly being monitored and evaluated in light of possible changes in the sanctions imposed.

Credit and counterparty risk has had a low impact at this stage, due to very limited direct and indirect exposure to Russia and Ukraine. The issuers most exposed to the crisis (energy companies and banks) are subject to constant monitoring, without warning at this stage.

CNP Assurances is, with its shareholder La Banque Postale, fully mobilized to face the current crisis with confidence, in the best interests of its stakeholders.

D. Valuation for Solvency Purposes

Valuation Principles

The Company prepares its financial statements under the IFRSs. Accordingly, fair value is already calculated for many of its assets and liabilities (particularly financial instruments) and is then included either directly in the IFRS Statement of Financial Position or disclosed in the notes to the financial statements.

For its SII Statement of Financial Position, the Company uses the fair value of assets and liabilities as calculated for IFRS accounting purposes, insofar as this value complies with SII asset and liability valuation principles.

This ensures that a reliable SII Statement of Financial Position is produced as part of an orderly, well-managed process. It also ensures consistency with the IFRS financial statements.

There are instances where, the value of certain items may be estimated using simplified approaches (e.g., cost price or cost) when those items do not represent significant exposure or when the difference with fair value as calculated under IFRS is not material. The Company is consistent in applying alternative valuation techniques unless the change in method would result in a more appropriate measurement.

Criteria for Active Market Identification

SII requires entities to use values obtained from transactions carried out on active markets wherever possible.

If no active market transactions are available, a significant element of judgement will need to be used in the valuation as regards the choice of valuation methods as well as the assumptions, inputs and data to be used. Such an approach must be part of a well-managed process in order to achieve unbiased valuations.

To assess whether a market is active for SII asset and liability valuation purposes, the Company uses the same criteria as in its IFRS accounting process.

For valuations and fair value measurements under IFRS 13-Fair Value Measurement, prices obtained from transactions carried out on an active market should be used where possible. For financial instruments in particular, the Company uses the fair value hierarchy set out in IFRS 13. Instruments classified in Level 1 in the notes to the IFRS financial statements are considered as having been obtained on an active market when preparing the SII Statement of Financial Position.

General principles and rules for classifying items according to the IFRS 13 fair value hierarchy are summarised in the notes to the IFRS financial statements.

The Assets and Liabilities are presented below:

Assets In Thousands €	Statutory Accounts value	Solvency II value	Difference
Deferred acquisition costs	41	0	-41
Deferred tax assets	119	0	-119
Property, plant & equipment held for own use	304	155	-149
Investible Assets	23.469	23.469	0
Assets held for index-linked and unit-linked funds	16	16	0
Loans & mortgages	17	0	-17
Reinsurance recoverables	246	252	6
Insurance & intermediaries receivables	468	468	0
Reinsurance receivables	230	230	0
Receivables (trade, not insurance)	171	171	0
Cash and cash equivalents	1.552	1.552	0
Total assets	26.633	26.311	-322

Liabilities In Thousands €	Statutory Accounts value	Solvency II value	Difference
Technical provisions	17.668	17.543	-125
Provisions other than technical provisions	50	50	0
Pension benefit obligations	33	33	0
Insurance & intermediaries payables	229	229	0
Reinsurance payables	0	0	0
Payables (trade, not insurance)	1.287	1.287	0
Other Liabilities	187	187	0
Total liabilities	19.455	19.329	-125

D.1. Assets

Specific Rules for asset valuation and gap between Financial Statements

Deferred Acquisition Costs

The IFRS value was €41k (2021: €47k), whereas in the SII Statement of Financial Position they were valued at nil, based on the SII valuation principles in the EIOPA Guidelines.

Property, Plant and equipment

The IFRS value was €304k (2021: €337k), whereas in the SII Statement of Financial Position were valued at €155k (2021: €235k). The difference relates to the recognition of right of use asset following the adoption of IFRS16:leases. The difference between IFRS and SII value relates to building improvements which are valued at nil for SII purposes.

Deferred Tax Assets

The Company had recognised Deferred Tax Asset of €119k (2021: €125k) under IFRS principles mainly related to the damage resulting from the exchange of Greek government bonds (PSI). For SII purposes the Company reduced this asset to nil. Furthermore, no Deferred Tax is recognised on SII adjustments.

Loans & mortgages

The IFRS value was €17k (2021: €28k) whereas the value in SII Statement of Financial Position was nil.

Insurance & intermediaries receivables

Insurance & intermediaries receivables are amounts due from customers (i.e., from policyholders) and are recognised initially at fair value and subsequently measured at amortised cost, using the effective interest rate method, less provision for impairment.

The IFRS value was €468k (2021: €53k) being the same value as in the SII Statement of Financial Position.

A provision for impairment of trade receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or delinquency in payments are considered indicators that the trade receivable is impaired.

The amount of the provision is the difference between the carrying amount and the recoverable amount. The carrying amount of the asset is reduced through the use of a provision account, and the amount of the loss is recognised in Statement of Comprehensive Income. When an amount is uncollectible, it is written off against the allowance account for insurance receivables. Subsequent recoveries of amounts previously written off are credited in Statement of Comprehensive Income.

The value of the Insurance & intermediaries receivables under SII does not differ from IFRS one.

The provision for impairment as at 31 December 2022 amounts to €150k (2021: €150k).

Reinsurance recoverable and Receivable

The IFRS value was €476k (2021: €414k) whereas the value in the SII Statement of Financial Position was €482k (2021: €404k).

Amounts recoverable from reinsurers were replaced by the SII reinsurance recoverable amount.

Receivables (trade, not insurance)

The IFRS value of Receivables was €171k (2021: €64k) same value as in the SII Statement of Financial Position relating to a receivable from the Greek Tax Authorities.

The Company considers that the IFRS value is not significantly different from the fair value.

Fair value may be determined on a case-by-case basis if the IFRS value is likely to differ significantly from fair value, for example due to the impact of discounting.

Investment Assets

Investment assets were valued at Fair Value for IFRS purposes. The IFRS value of the Company's total Investible Assets, including Cash and Cash equivalents, was €25.036k (2021: €23.785k) and is detailed below.

The value of the Investment Assets under SII does not differ from IFRS.

Assets Under Management by Asset Category		
In Thousands €	Market Value 31/12/2022	Market Value 31/12/2021
Equity – In-house	3	2
In-house Bonds	11.745	9.015
Bond Funds	6.717	7.450
Equity Funds	169	185
Property Funds	2.582	2.798
Money Market Funds	2.268	2.278
Cash	1.552	2.057
Total Company	25.036	23.785

The valuation method for each security depends on several factors.

Equities

The very low exposure in equities held by the Company is listed in regulated markets in countries which are members of the European Economic Area or the Organization for Economic Cooperation and Development, therefore the closing price in those markets is used for valuation purposes.

Bonds

The same valuation method applies for government bonds and corporate bonds if the asset is considered liquid. For bonds which are illiquid, the Company uses yields derived from similar securities (from the same issuer) in active markets and with the use of linear interpolation, estimates the price of the illiquid securities.

Funds

All funds the Company invests in, offer daily liquidity and the price is received by the fund manager or via Bloomberg.

D.2. Technical Provisions

Methods and Assumptions

The Company's portfolio has been analysed and classified after a segmentation process into various homogeneous risk groups for the calculation of Technical Provisions, having regard to the minimum SII Directive groupings.

The following risk classification has been performed:

- Index-linked and unit-linked life insurance
- Life Insurance with Profit Participation
- Other Life Insurance
- Health Similar to Life (HSLT)
- Health Non-Similar to Life (HNSLT)

Technical Provisions

SII requires undertakings to set up technical provisions which correspond to the current amount undertakings would have to pay if they were to transfer their (re)insurance obligations immediately to another undertaking. The value of technical provisions is equal to the sum of a best estimate and a risk margin.

Undertakings should segment their (re)insurance obligations into homogeneous risk groups, and as a minimum by line of business, when calculating technical provisions.

The actuarial and statistical methods to calculate technical provisions are proportionate to the nature, scale and complexity of the risks supported by the undertaking.

The Company does not make use of any transitional measures apart from the volatility adjustment.

Best Estimate of Technical Provisions

The Gross BE for Life business technical provisions is the result of the present value of gross cash outflows less gross cash inflows. More specifically, cash outflows include claims, maturity payments, surrender payments, expenses, premium tax and commissions.

For the Health NSLT business, Non-life techniques are used. The BE for Non-Life consists of:

- Premium provisions (cash flow projections related to claim events occurring after the valuation date and during the remaining in-force period of the policies)
- Claim provisions (cash flow projections related to claim events having occurred before or at the valuations date-whether the claims arising from these events have been reported or not).

Premium Provisions

For premium provisions the method used is based on an estimate of the combined ratio of the line of business in question.

Claims Provisions

This is the sum of the total undiscounted indicated claims reserves. The Company has allocated the total expenses in the in-force portfolio and for this reason Claims Handling Expense reserve isn't included, since it is already included in the premium reserve.

The Best Estimate for Life business is mainly calculated through a dedicated software where all variables are checked. In this software, actuarial models were appropriately set up. For Health NSLT, Best Estimate calculation models were set up in spreadsheets.

Best Estimate of Reinsurance Recoverable

Reinsurance recoverable is calculated through appropriate modelling of the reinsurance arrangements.

Description of Model

Deterministic models are used for all business with the exception of Life with profit participation with interest rate guarantee. For these exceptions the Company uses a stochastic model.

Models are built in the Company's Actuarial software used for the SII projections.

For all Life policies, a contract-by-contract approach has been used and cash flows have been projected until the end of the portfolio (with no residual cash flow).

For the Health business classified as Health NSLT, non-life deterministic models have been used. The actual 12-month period data, i.e., 2021 – 2022, have been used to determine the respective loss ratios gross and net of reinsurance.

Product mapping was performed in the past and must be updated/adjusted to allow for new products or changes to existing products.

The projection models are used for all the activities performed by the Actuarial Function with appropriate adjustments in parameters or run settings.

The Actuarial Function ensures the appropriateness of the methodologies and underlying models used.

Based on the description of the different products, actuarial knowledge and specifications (such as technical specifications of SII and CNP Assurances guidance), appropriate models are set up and variables are created.

Any changes in product description or creation of new product must be taken into account in modelling.

Assumptions

The assumptions used in the models are determined by the Actuarial Function using past experience studies and expert judgement. Assumptions are reviewed and challenged by the Risk & Reserving and Audit & Risk Committees.

Economic Assumptions

Income tax assumptions

The existing tax rate is used as per the current legislation.

Guaranteed Interest rate

The Company has products with guaranteed interest rates. For the products which the Company has the right to change the level of guarantee, this is done taking into account the current economic conditions, the product loadings and Company's TAA.

Deterministic and stochastic approach

For the technical provisions calculation, the Company uses deterministic approach except from the products with profit participation in which the Company does not have the right to change the level of the guaranteed interest rate.

Yield Curves

Yield curves with volatility adjustment for Greece used are obtained from EIOPA website upon publication while the stochastic scenarios are internal. More specific the modelling of the macroeconomic and financial environment is based on a set of risk factors the evolution of which is foreseen on one or more trajectories. These data are generated using Barrie & Hibbert's economic scenarios generator.

The table below shows the impact of a change to zero of the volatility adjustment on the technical provisions, SCR, MCR and on the Own Funds. Although the Own Funds are reduced if yield curves with no volatility adjustment are used, the impact is small (0,54% reduction in Own Funds).

In Thousands €	With VA	No VA	Results with VA vs No VA
Best Estimate (Net of Reinsurance)	17.230	17.268	99,78%
Risk Margin	61	61	99,96%
Technical Provisions	17.291	17.329	99,78%
SCR	2.500	2.501	99,99%
MCR	4.000	4.000	100,00%
Eligible OF to meet MCR	6.982	6.944	100,54%
Eligible OF to meet SCR	6.982	6.944	100,54%
Own Funds	6.982	6.944	100,54%

Operational Assumptions

Mortality

The mortality assumption is set based on the 2012 Hellenic Actuarial Association mortality table (EAE2012A).

Disability

The disability assumption was set based on the reinsurance experience in the Greek Insurance Market.

Lapses/surrenders

A study is performed at the end of each year. Data since 2011 are used since previous behaviour is not indicative to project the future experience. The study is performed on a per product level.

Reinsurance premium ratios

For the Life and riders, the reinsurance tables of the Company's existing treaties have been used.

Health NSTL business

The loss ratio over the last three years is used for the determination of the premium provision. For claims provisions, loss development factors are calculated on the basis of the 5 year average incurred claim's cost.

Expense Assumptions

Expense assumptions were determined using the Company's 2022 experience. This cost was allocated to all in force policies and benefits. Different weights according to the category of the main benefit and the number of the benefits under the same policy have been used. Expense figures were increased by the inflation rate.

Risk Margin Calculation

The risk margin is a part of technical provisions in order to ensure that the value of technical provisions is equivalent to the amount that insurance and reinsurance undertakings would be expected to require in order to take over and meet the insurance and reinsurance obligations.

The risk margin should be calculated by determining the cost of providing an amount of eligible own funds equal to the SCR necessary to support the insurance and reinsurance obligations over the lifetime thereof.

The rate used in the determination of the cost of providing that amount of eligible own funds is called Cost-of-Capital rate.

In order to calculate the Risk Margin, the calculations of the projected SCR of the Company in each point in time is required. Due to the complexity of the Risk Margin definition and calculation, a simplified method is used based on EIOPA technical specifications. A simplification using the overall SCR for each future year (level 3 of the hierarchy as defined in the relevant technical specifications) is used.

Simplifications

Premium Provisions for Health Non-Similar to Life (HNSLT)

Due to the size of the annual renewable in-hospital products (compared to the total portfolio) and the limited risk exposure of the primary care products, simplified models have been used for the calculations of Health Non-Similar to Life portfolio based on an estimate of the combined ratio of the line of business in question.

Risk Margin

Due to the complexity of the Risk Margin definition and calculation, a simplified method is used. The Risk Margin is calculated on the basis of the 3rd simplification method, as explained above, which uses the SCR related to Risk Margin at time zero, the Best Estimate of technical provisions at time zero and forecasts of Best Estimate for each future time period.

Gap with Financial Statements

The differences between the SII Technical Provisions (gross of reinsurance) and the financial statements reserves of 2022 and 2021 (gross of reinsurance) for each line of business is presented below:

Material differences between SII Technical provisions and IFRS Reserves are for Life insurance with profit participation, mainly due to the yield rates constructed by EIOPA and due to the annual rate of return under the stochastic approach.

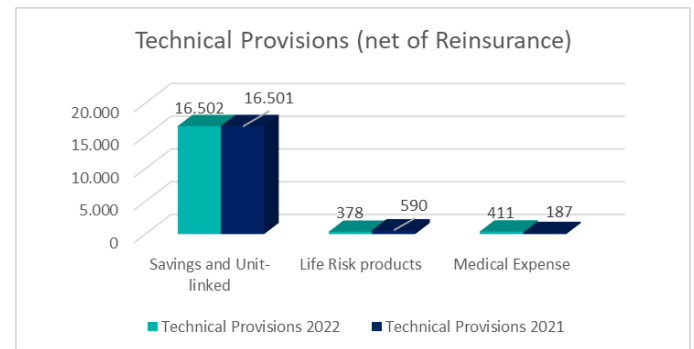

Technical Provisions In Thousands €	SII EOY 2022	FS 2022	SII EOY 2022 vs FS 2022	SII EOY 2021	FS 2021	SII EOY 2021 vs FS 2021
Unit-linked & index-linked	-39	16	-55	-26	8	-34
Life - Other life insurance	391	441	-49	507	499	8
Life insurance with profit participation	16.541	16.630	-89	16.527	15.745	782
Health (similar to life)	48	83	-35	351	358	-7
Health (similar to non-life)	601	498	103	278	253	25
Total	17.543	17.668	-125	17.637	16.863	774

Main Results

Technical Provisions

Technical provisions of liabilities are defined as the sum of BE and Risk margin.

The values of the Technical Provisions of liabilities (Net of Reinsurance) as at the end of year 2022 and 2021 are presented below based on Solvency II lines of business.

In Thousands €	Technical Provision 2022 (Net of Reinsurance)	Technical Provision 2021 (Net of Reinsurance)
Unit-linked & index-linked	-39	-26
Life - Other life insurance	339	465
Life insurance with profit participation	16.541	16.527
Health (similar to life)	38	125
Health (similar to non-life)	411	187
Total	17.291	17.277

The net technical provisions (total best estimate and risk margin) have been slightly increased by €14k since EOY 2021.

This increase is the overall balance resulting from the increase of the BE of Life with Profit participation business due to new premiums combined with updated yield curves, the increase in Health NSLT business due to significant increase of outstanding claims, offset by the decrease in BE of all remaining lines of business due to the shrinking portfolio of the Company (majority is run-off).

Life insurance with profit participation is the largest source of business for the Company hence formed 96% of the total Technical Provisions.

Other Life insurance and Health NSLT have a 2% contribution each to the Total Technical Provisions.

The following figure illustrates the movement of Net Technical Provisions between 2022 and 2021.

Net Best Estimate

The values of the Best Estimate (Net of Reinsurance) as at the end of year 2022 and 2021 are presented below based on SII lines of business.

In Thousands €	Best Estimate 2022 (Net of Reinsurance)	Best Estimate 2021 (Net of Reinsurance)
Unit-linked & index-linked	-39	-26
Life - Other life insurance	338	461
Life insurance with profit participation	16.483	16.387
Health (similar to life)	38	124
Health (similar to non-life)	410	185
Total	17.230	17.130

As expected, Life insurance with Profit participation has the largest contribution to BE with 96% of the total BE. Other Life Insurance and Health NSLT follow with a total of 2% contribution each.

The decrease in Other Life Insurance and Health (similar to Life) is due to the decrease of the run-off portfolio plus the decrease of the outstanding claims amount classified for these lines of business during the reporting period.

Risk Margin

For the Risk Margin calculation, the SCR of the year and the projected best estimates of liabilities for each future year are being used.

The values of the Risk Margin as at the end of year 2022 and 2021 are presented below based on SII lines of business.

In Thousands €	Risk Margin 2022	Risk Margin 2021
Unit-linked & index-linked	0	0
Life - Other life insurance	1	4
Life insurance with profit participation	58	140
Health (similar to life)	0	1
Health (similar to non-life)	1	2
Total	61	147

Life Insurance with Profit participation had the largest contribution to Risk Margin being 95% of the total Risk Margin.

Other Life Insurance and Health NSLT follow with 2% contribution each to the total Risk Margin.

Risk margin decreases significantly compared to 2021 mainly driven by a decrease of the overall factors participating in the calculation formula and an adjustment in the calculation formula so as to take the 12-months worth of cashflows and not as at every year end.

Reinsurance Recoverable

Reinsurance Recoverable is defined as the difference of the Gross and Net Best Estimate.

The values of the Reinsurance Recoverable as at the end of year 2022 and 2021 are presented below based on SII lines of business.

In Thousands €	Reinsurance Recoverable 2022	Reinsurance Recoverable 2021
Unit-linked & index-linked	0	0
Life - Other life insurance	52	42
Life insurance with profit participation	0	0
Health (similar to life)	10	226
Health (similar to non-life)	190	91
Total	252	360

D.3. Other Liabilities

Specific Rules for liabilities valuation and gap between Financial Statements

Payables (Trade Not insurance)

The IFRS value of Payables was €1.287k (2021: €1.340k) and does not differ under SII.

The Company considers that this IFRS value does not differ significantly from the economic value of the liabilities, since amounts payable are due in the short term (less than one year).

Provisions other than technical

The carrying amount of other provisions, payables and accrued expenses is deemed to be a reasonable approximation to fair value. The IFRS value was €50k (2021: €60k) and under SII the value does not differ from IFRS.

Pension benefit obligations

Pension benefit obligations include the benefits payable to the Company's employees after they retire (retirement compensation, additional pension benefit). The IFRS value was €33k (2021: €27k) and under Solvency II the value does not differ from IFRS.

Insurance & intermediaries payables

The carrying amount of Insurance and intermediary payables is deemed to be a reasonable approximation of fair value. Balances payable include actual account balances due, mainly to the company's distribution network. The IFRS value was €229k (2021: €276k the difference is mainly due to time differences of payments) and under Solvency II the value does not differ from IFRS.

Reinsurance payables

The carrying amount of Reinsurance payables is deemed to be a reasonable approximation of fair value. Balances payable include actual account balances due. The IFRS value was nil (2021: €6k) and under SII the value does not differ from IFRS.

E. Capital Management

E.1. Own Funds

CNP Zois has a simple share capital structure. It is a wholly owned subsidiary of CNP CIH Ltd which is 100% owned by CNP Assurances S.A. since October 2019.

The excess of Capital over Liabilities (Own funds) of the Company under IFRS amounts to €7.176k and consist of:

- Share capital comprised of issued and fully paid ordinary shares.
- Retained earnings which is the cumulative net income not distributed to its shareholder as dividend
- Other Reserves, not distributable as dividends (AFS reserve).

The Excess of assets over liabilities under SII amounts to €6.982k. The difference compared to IFRS figure is mainly due to the differences in the calculation of Technical Reserves which is calculated based on SII principles.

Due to the unfavourable market conditions caused by the pandemic and boosted by the Ukrainian crisis, the BoD decided to approve a capital injection of a total of €4 million during the reporting period. Additionally, the Company proceeded with a nominal decrease of its share capital by €4 million be netting against retained losses. The net impact from the changes in share capital resulted in a net increase of net asset position of approximately €4 million.

The capital management plan (management of Own Funds) is defined as a result of the strategic planning exercise, and is part of the overall framework set by this exercise, in terms of dividend payments, capital increase, etc. It takes into account the Solvency projections from the work carried out as part of the strategic planning.

It can be adjusted upon the occurrence of a major event on markets (stress situation in equities, bonds), or affecting CNP Zois (acquisition, business disposal, other event). If the situation requires the full or partial review of the strategic planning exercise, this is revised accordingly.

Based on Company's financial projections as stated in the approved Business Plan, the Actuarial Function Holder performs the Solvency II calculations to ascertain whether the capital levels are adequate to enable the Company to continue as a going concern.

The Finance Function is responsible for preparing the Company's Business Plan, which is then approved by the BoD. The financial projections of the Company are based on the strategic plan and targets set by the Company for the planning horizon, in conjunction and taking into consideration, the external and internal environment that the Company operates in.

The budget is used as an input to the capital planning. Capital planning includes projections of internal capital requirements (Pillar 1 and 2) and Own Funds over the planning period. These projections are calculated based on the projected Statement of Financial Position structure of the Company, reasonable assumptions, parameters, correlations or levels of confidence decided by the Risk & Reserving Committee.

Projected capital requirements are compared with Own Funds so that the Company is able to observe whether the forecasted available Own funds of the Company will be adequate to cover any future strategic actions that the Management intends to take.

Prospective changes in the Company's risk profile and how they affect its current and projected level of solvency requirements are taken into account during the capital planning process. The quality and profile of the Company's own funds over the planning period is also taken into consideration.

The Company monitors the procedure described above and is regularly informed about the outcome of the various calculations performed at each step of the procedure.

Information is also provided to the Risk Management Function to quantify and assess the risks that the Company faces.

Structure, Amount and Quality of Own Funds

Basic Own Funds

The Own Funds of the Company under IFRS amount to €7.176k and under the SII amount to €6.982k.

The table below illustrates the split of Basic Own Funds under IFRS and Solvency II as at the end of the year ended 31 December 2022 compared to the year ended 31 December 2021.

In Thousands €	2022		2021	
	SII Statement of Financial Position Value	IFRS Statement of Financial Position Value	SII Statement of Financial Position Value	IFRS Statement of Financial Position Value

Total eligible own funds to meet the MCR	6.982	6.982	0	0	4.920	4.920	0	0

E.2. Solvency Capital Requirement and Minimum Capital Requirement

Solvency Capital Requirement valuation method

The overall SII Capital Requirement is calculated using the standard formula as described in the technical specifications.

The Company's Solvency Capital Requirement is composed by:

- The Basic Solvency Capital requirement.
- The Operational SCR and
- Allowing for any adjustment for the risk absorbing effect of technical provisions and deferred taxes.

Each SCR module is calculated based on the technical specifications of EIOPA.

The basic idea for the SCR calculation is to look at the values of assets and liabilities using the SII calculation methods before and after each shock. The SCR is defined as below:

$$SCR = \max \left\{ \left[\frac{(Market\ Value\ of\ Assets\ Central - Market\ Value\ of\ Assets\ Shock) - (Best\ Estimate\ of\ Liabilities\ Central - Best\ Estimate\ of\ Liabilities\ Shock)}{1} \right], 0 \right\}$$

Solvency Capital Valuation Principles
SCR and MCR as at 31/12/2022

Bank of Greece, as the Supervisory Authority pursuant to Article 41 of Law 4364/2016, may require the modification or revision of published Company reports or the publication of additional information, as well as other actions taken by its management.

The total Solvency Capital Requirement of CNP Zois as at the end of 2022 was €2.500k with a total Minimum Capital Requirement of €4.000k. These amounts are subject to supervisory assessment.

In Thousands €	EOY 2022

Health CAT	189
SCR Counterparty	308
Type 1 Counterparty	252
Type 2 Counterparty	70

SCR as at 31/12/2022

The SCR of the Company is calculated based on the standard formula provided by the SII guidelines. The analysis of the 2022 by risk module is indicated below.

The SCR of the Company consists of the Basic Solvency Capital Requirement of €2.300k and the Operational SCR of €200k.

The Basic Solvency Capital Requirement is due to the combination of market risk, life and health underwriting risk and counterparty risk after allowing for diversification between and within those risk modules.

The main risk drivers are the Market risk of €2.103k and Counterparty risk of €308k given the underlying business of the Company.

The greatest component of Market risk is Spread risk of €1.148k. The greatest component of counterparty risk arises from the Type 1 shock of €252k.

In Thousands €	EOY 2022	EOY 2021	Percentage Change
SCR	2.500	2.604	-4%
MCR	4.000	3.700	8%
SCR Operational	200	227	-12%
SCR Market	2.103	2.019	4%
SCR Life	64	270	-76%
SCR Health	249	205	21%
SCR Counterparty	308	535	-43%

SCR has been decreased by 4% during the reporting period compared to the previous reporting period. This decrease is mainly due to the decrease in Life and Counterparty risks.

MCR as at 31/12/2022

The Minimum Capital Requirement calculation is derived as the maximum value between the absolute value MCR and the combined MCR. The absolute MCR based on SII regulation comes up to €4.000k for the life business.

As the combined MCR is lower than the absolute value, the MCR of the Company equals the absolute MCR of €4.000k.

The combined MCR is derived as the lower of MCR cap (45% of SCR) and of the highest of MCR floor (25% of SCR) and MCR linear. The MCR linear is derived in terms of the life and health non-similar to life business. The main inputs used for the calculation of the combined Minimum Capital Requirement are the SCR, best estimates of technical provisions net of reinsurance recoverable, the capital at risk for life business and the written premium over the last 12 months for the health non-similar to life business. The capital at risk is the value the Company will pay in the event of death or disability less the amount of best estimate of liabilities (both net of reinsurance).
